Revision History

Date Changes Made	Version	Changes Made	Changes Made By
July 23, 2012	0.1	Initial draft version	Terry Byars
October 26, 2012	0.2	Draft	Judi Scott
November 19, 2012	0.3	Review and additional comments based on BUC walkthroughs	Terry Byars
December 3, 2012	0.4	Updates after data meetings with HC and CFIA	Terry Byars
December 7, 2012	0.5	Internal BDD Team Review	Terry Byars
January 14, 2013	0.7	Completion of removal of mini-message ins Removal of mini-message instructions due to change in deployment plan, resulting in mini-messages not being in place until last release (Build C) Returning name of document to ECCRD	Terry Byars
January 28, 2013	0.8	Addition of GOVCBR/UN EDIFACT Message Map Instructions	Terry Byars
March 15, 2013	0.9	Inclusion of GOVCBR/UN EDIFACT Inbound Message Structure and Implementation Guide for release to PGAs and Trade in anticipation of Technical Design Session scheduled for March 27th	Terry Byars
July 12, 2013	0.10	Updated information and added interpretative instructions regarding PGA specific appendices.	Terry Byars
Aug 16, 2013	0.11	CFIA, DFATD, TC, HC, NRCan appendices added. Updated MIG and code tables.	Dan Rochon
February 6, 2014	1.0	Updated information and interpretative instructions, inclusion of all GOVCBR EDIFACT requirements (inbound and outbound), Code Tables and PGA Appendices for Release 1	SWI Team
February 13, 2014	1.1	Incorporated HC Feedback	SWI Team
March 18, 2014	1.2, 1.31	Addition of Multiple CCN reporting information, more PGA feedback	SWI Team
June 30, 2014	2.0	Revisions to accommodate development, trade and PGA concerns within 1.31	SWI Team
July 11, 2014	2.1	Revisions on PGA & internal CBSA feedback	SWI Team
August 5, 2014	2.1	Reprinted with missing business definitions & typo fixes	SWI Team
November 16, 2016	3.0	Incorporated changes from V2.1 including Addendums 1, 2, 3, 4, Change Requests and additional content.	SWI Team
March 24, 2016	4.0	Revision of CNSC appendix (B2), addition of ECCC appendices (B3) and minor corrections	SWI Team

1 Introduction

The “*Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness*” announced by Prime Minister Harper and United States (U.S.) President Obama on February 4, 2011, established new long-term partnerships that will support trade and commerce between Canada and the U.S., while strengthening security and regulatory cooperation. Two key areas of cooperation identified were addressing threats early at the border by developing common practices, and streamlining procedures for customs processing and regulatory compliance. A joint action plan was developed, the Perimeter Security and Economic Competitiveness Action Plan (hereinafter the “*Action Plan*”), and announced on December 7, 2011.

The Single Window Initiative (SWI) was identified as one of 32 joint priorities that will facilitate trade and align regulatory approaches to protect health, safety and the environment while supporting growth. The Action Plan commits the Canada Border Services Agency (CBSA) and U.S. Customs and Border Protection (U.S. CBP) to providing traders with a single window through which they can electronically submit all information required to comply with government import regulations, resulting in more efficient border processes.

Importers/Brokers (IBs) will no longer be required to send duplicate information, in duplicate formats, via different delivery mechanisms to multiple agencies to meet regulatory requirements. The existing Pre-Arrival Review System (PARS) is being enhanced to include all Participating Government Agency (PGA) commercial import data requirements in an Integrated Import Declaration (IID). For more information on PARS, please refer to <http://www.cbsa-asfc.gc.ca/eservices/eccrd-eng.html>. The IID includes only data essential for PGAs (including the CBSA) to make border-related decisions and acts as the foundation for the modernization of government business processes to eliminate requirements for presentation of paper documents at the border.

1.1 Integrated Import Declaration (IID)

The IID is the new electronic message that the CBSA has developed to allow traders to submit information to meet CBSA requirements as well as the requirements of PGAs that also regulate the commercial importation of certain commodities.

The CBSA will collect the IID on behalf of and send the relevant information to the PGAs. Different PGAs have opted to use the information in different ways. Some PGA programs may participate in pre-arrival processing for certain PGA commodities, while others may opt to receive IID data only after CBSA release of the goods to perform post-border processes, such as compliance verification, client support, or to administer tariff rate quotas.

The IID can be used to meet several types of Government of Canada import requirements. These are CBSA release, PGA requirements and (potentially) future CBSA Importer Advance Trade Data (ATD) requirements.

1.2 World Customs Organization Government Crossborder Regulatory Message Structure (WCO GOVCBR)

The IID Electronic Data Interchange (EDI) message has been developed based on the WCO Data Model which uses the GOVCBR/UNEDIFACT compliant message structure and type. The GOVCBR expands upon the work of the WCO data model that was developed by 172 participating countries, including Canada for importation and exportation of goods to include all governmental cross-border regulatory procedures within one message structure.

GOVCBR allows for international and inter-governmental messaging for all procedures, including Licence/Permit/Certificate/Other (LPCO) document approval processes, digital image information and allows flexibility to provide information during all stages of the importation, in-transit and export processes.

1.3 Document purpose

The purpose of this document is to provide IBs and CBSA EDI partners with technical user information related to EDI transmission of the IID.

This document includes technical information on new functionality. This functionality includes the ability for importers and brokers to transmit information pertaining to digital images of paper documents, such as phytosanitary certificates, veterinary certificates and other documents that cannot be dematerialized into the EDI message due to PGA regulatory requirements or other international agreements. As the CBSA and other PGAs continue to work with the WCO and other international organizations in the development and promotion of eCertification and dematerialization of paper documents, the IID process will be expanded to support 100% international electronic certification (eCert) processes.

Also included in this document is information regarding transmission of change, cancel, and amend transmission processes and circumstances when the IID transmission can be used to satisfy the CBSA future eManifest ATD requirements. For more information regarding eManifest Importer ATD requirements, please refer to <http://www.cbsa-asfc.gc.ca/prog/manif/reqimporteurs-eximportateurs-eng.html>

The accompanying appendices provide CBSA clients with a glossary of IID data elements, UN/EDIFACT GOVCBR message structure and implementation guides for inbound maps and outbound maps and applicable code sets. Also included are PGA program specific appendices to provide detailed information regarding transmission requirements for specific PGA commodities for the following PGAs (Canadian Food Inspection Agency (CFIA), Health Canada (HC), Public Health Agency of Canada (PHAC), Transport Canada (TC), Global Affairs Canada (GAC) (formerly Department of Foreign Affairs, Trade and Development - DFATD), Natural Resources Canada (NRCan), Fisheries and Oceans Canada (DFO), Environment and Climate Change Canada (ECCC) (formerly Environment Canada) and Canadian Nuclear Safety Commission (CNSC). Future iterations of the Electronic Commerce Client Requirements Document (ECCRD) will include inbound and outbound maps in XML format, and appendices for any remaining PGA agency programs, and any updated error code tables, not included in this iteration.

1.4 Scope

The scope of the SWI includes modernization of the CBSA and 9 PGA processes. A total of 38 program areas' importation processes are being modified to deliver an integrated interface for information required pre-border, at-border and post-border for processing of commercial goods.

As the SW Project moves forward, it is anticipated that other PGA programs, not currently part of this particular release of the SWI implementation, will become SW participants as their program capacity to modernize is defined. This document will be evergreen through the project lifecycle and will be updated as program requirements, systems upgrades and/or changing operational requirements are realized.

The SWI Business Design and Development (BDD) team, in partnership with the **Technical Commercial Client Unit (TCCU)** will endeavour to provide as much advance notice as possible of system changes and will notify clients of upcoming changes via e-mail. Please ensure that any e-mail address information provided to the CBSA TCCU is kept up to date for this purpose. We recommend that clients review all narrative sections of this document in conjunction with the message maps as some operational rules impact system programming.

Any queries or documentation requests should be directed to the CBSA SWI Generic Mailbox at the following email address:

SWI-IGU@cbsa-asfc.gc.ca

For information related to the application and/or testing processes to become a SWI client please contact:

Technical Commercial Client Unit

Fax: (343) 291 5482

Email: tccu-ustcc@cbsa-asfc.gc.ca

1.5 Future Versions

SWI implementation is based on readiness of PGAs programs and systems. As such, the transmission of IID and its submission methods along with the rules associated with them, are subject to change.

Although the data requirements of the majority of the individual PGA programs are included in this version of the document, there are some PGA programs, that due to IT readiness and/or impending legislative/regulatory amendment, will not be ready for early SW implementation and will be onboarding to the system based on their readiness.

This document is therefore to be considered a draft as further iterations will be available to provide additional details related to the CBSA eManifest implementation that may affect IID processing and PGA legislation, processes and/or systems evolve.

1.6 Requirements eligible for IID

The IID can be used to submit information required for CBSA/PGA release processing. Previously this CBSA service was known as the Other Government Department/Pre-Arrival Review System (OGD/PARS) and/or Other Government Department/Release on Minimum Documentation (OGD/RMD) Service options.

1.7 Requirements not eligible for IID

The following processes are either outside the scope of the SWI initiative or require processing of paper upon arrival at the border so are not currently included as an IID EDI transmission option.

- Temporary Importations (e.g. E29B, ATA Carnet).
- Diplomatic goods carried by a commercial carrier
- Orders In Council
- Personal Importations imported through the CBSA travellers stream
- Settlers Effects
- Returning Residents
- Estimated to Arrive and Value Included
- Courier/Low Value Shipment processing
- Commercial "C" Type (Cash) B3 entries

1.8 Document Image Functionality (DIF)

In accordance with Participating Government Agency (PGA) legislative requirements and/or international agreements, there is a requirement for Trade Chain Partners (TCPs) to submit paper documents with their IID. For example Phyto/Zoo-sanitary certificates, Veterinary certificates, Kimberley Diamond certificates, etc., unfortunately cannot be dematerialized at this time. As a result, to reduce paper and improve efficiency, CBSA has developed Document Image Functionality (DIF). This functionality allows TCPs to submit paper Licenses, Permits, Certificates and Other Documents (LPCOs), electronically as images through the Web.

Information and instructions required to develop and submit LPCO Images can be obtained through a separate document titled, the "Participants Requirements Document". Please contact TCCU to obtain the latest version.

Fax: (343) 291 5482
Email: tccu-ustcc@cbsa-asfc.gc.ca

1.9 Future Use CSA Program Potential of the IID

The Customs Self-Assessment (CSA) program is a CBSA Trusted Trader program for low-risk, approved importers, carriers and registered drivers with a proven compliance record that have met stringent requirements. CSA allows streamlined clearance of eligible goods as there is no requirement to provide transactional data pre or upon arrival at the border.

Goods that are controlled, prohibited, or regulated by an Other Government Department (OGD) are currently ineligible for CSA clearance, unless the importer enters into an agreement to provide OGD requirements after CSA clearance. There are some PGAs who have begun looking at processes and procedures for certain goods, that allow them to receive transactional information pre or post-border, while still allowing current and future Trusted Trader/CSA clients expedited CBSA CSA clearance processes at the border. The IID has been developed with this future use in mind based upon CBSA and PGA trusted trader program direction.

1.10 Accounting Considerations

Although the IID supports more levels and lines of information than previous release transactions, clients who submit accounting data by way of EDI using the CBSA's Customs Automated Data Exchange (CADEX) system will still need to consider the capacity limitations of the CADEX system when constructing IIDs.

In particular, the **K170 Input Invoice Cross-Reference Record** requires that an Invoice Line Number be provided, and the field for that entry is limited to 3 digits. This will generally limit the usage of the overall lines (that is, GAGI x Commodity Lines) of an IID invoice to 999 lines. Until such time as improvements to the accounting systems at the CBSA are implemented, clients are recommended to use one or more of the following workarounds:

- Construct their IIDs such that no invoice contains more than 999 overall lines; and/or
- Construct their IIDs such that all lines for identical HS codes are grouped by invoice pages, to allow the combination of these lines on the B3. This would allow the transmission of a value of 0 for the Invoice Line Number as per p43 of the CADEX PRD (2013).

2 IID transmission requirements

This section provides key information that CBSA clients need to know when transmitting an IID to the CBSA via EDI. It outlines importer registration requirements, describes EDI transmission processes, and provides general system pre-requisites.

2.1 Message functions

When transmitting IID data to the CBSA via EDI, there are four types of functions that can be performed: an add function; a change function; a cancel function; and an amend function.

2.1.1 Add Function

The “Add” function is a processing indicator identifying that the transmission of the message is an original. The transmission must contain a valid Cargo Control Number (CCN) and a unique Transaction Number. The Transaction number is a 14-digit number, the first five digits of which is comprised of the CBSA issued account security number of the I/B.

2.1.2 Change Function

The “Change” function involves the re-transmission of all data elements transmitted in the Add/Original transmission. An “Add” transmission must be on file prior to sending a “Change” transmission. The Transaction Number transmitted with the original “Add” must be identical in the “Change” transmission. Clients are required to transmit a “Change” to update the current data transmission for any of the data information pertaining to the importation changes or to respond to a CBSA/PGA Reject notice *prior to arrival* of the goods at the First Port of Arrival (FPOA) in Canada.

2.1.3 Cancel Function

The “Cancel” is used to indicate that the goods are no longer being imported on the particular shipment and will result in the removal of the detailed information from the system. The Transaction number must be identical on the “Cancel” transmission as to the IID on file. The Cancel function can only be used by a TCP pre-arrival of the shipment at FPOA.

2.1.4 Amend Data Transmission

The “Amend” function also involves the re-transmission of all data elements transmitted in the original “Add” transmission and must be transmitted when updates are required *after the arrival* of the shipment at FPOA. An amendment code that specifies the type of amendment being made must be provided. For further information regarding these functions as they apply to the transmission of IID, refer to the Change/Cancel/Amend Business Rules.

2.2 IID Business Rules

This section outlines key business rules that govern the transmission of IID and provides information CBSA clients should be aware of regarding the processing of data. Though not exhaustive, it provides information regarding the rules that an IID transaction will be validated against, and other information that EDI clients need to know to successfully transmit IID to the SW system for processing.

2.2.1 Add/Original

1. The I/B is a CBSA registered EDI IID release participant with a valid Canada Revenue Agency (CRA) Business Number issued for import purposes¹, CBSA Account Security Number and has also contracted with a CBSA authorized carrier to transport the goods into Canada.
2. The I/B has determined that they have the required mandatory/conditional information required to compile the IID.
3. The I/B transmits the EDI message to the CBSA system for processing.
4. The CBSA system validates the EDI transmission to verify that the I/B is an authorized EDI document transmitter, the EDI message is syntactically correct, triggers appropriate notifications to the I/B, transforms the accepted IID transmission into a standard format for further processing, triggers store rules, determines which PGA program requires what data and the timeframes for providing the data to the appropriate program(s) to complete their processes, triggers status rules and sends appropriate notifications to originators.
5. If the IID includes an Approval number, such as an LPCO number, the system will validate the Approval Number. If the Approval number is invalid a Reject will be issued to the originator to indicate that the LPCO is invalid. The I/B may re-transmit a Change request with the valid number or contact the originating PGA to determine what additional information is required to meet the PGA program licencing/permit requirement to bring goods to the Border.
6. On a regular basis, the system will re-validate the Approval Number to ensure that the PGA program's permissions are still applicable. If they are no longer valid, a Reject will be issued to the I/B.
7. The IID must contain a unique 14-digit Transaction number (the first five digits of which represent the account security number of the I/B) and at least one valid Cargo Control Number (CCN).
8. The IID transaction may contain a valid PGA Government Agency Identification Code to identify the PGA regulatory requirements as applicable to the commodity/commodities being imported.
9. If the PGA Program has issued an LPCO number, it must be valid upon arrival of the goods at First Port of Arrival.

2.2.2 IID Change/Cancel/Amend Business Rules

These rules apply to the transmission of Change, Cancel or Amend IID transmissions:

1. CBSA clients will be able to provide a change or cancel request to their IID transmissions prior to the arrival of the shipment at the First Port of Arrival (FPOA) in Canada.
2. It is recommended that multiple changes to the same field not be sent in the same transmission, as the system cannot guarantee applying the changes in the same order they are received within a transmission.
3. Any post arrival changes to an IID (with the exception of the *IID Transaction Identifier* and the submitter's *Business Number (BN)*, which can only be changed through a manual, paper-based adjustment process), must be transmitted as an Amendment.
4. Requests to amend an IID transmission require an amendment reason code as listed in Appendix G25
5. An original IID Transaction must be on file in the CBSA system in valid status for a Change, Cancel or Amend transmission to be accepted. The original IID Transaction Number must be used when transmitting changed, cancelled, or amended data.
6. All data elements must be re-transmitted in a Change, Cancel or Amend transmission.

¹ A generic business number will not be accepted.

2.3 Filing Multiple Messages in One Transmission

In accordance with GOVCBR and UN/EDIFACT standards, clients have the option of combining multiple IID message types within a single EDI interchange.

Multiple IID declarations can be sent in a single EDI transmission as follows:

1. Transmit one UNB segment followed by one UNG segment.
2. Transmit the first IID in UNH to UNT using all the applicable segments of the map that appear in between.
3. Report the second and subsequent IID by repeating UNH to UNT using all the applicable segments of the map that appear in between.
 - o CBSA's EDI infrastructure has no limit on the number of UNH to UNT loops that can be repeated within the same EDI message. (exception, CBSA infrastructure capacity is currently limited to a maximum of 4MB for a single EDI message)
4. To end the EDI transmission, send one UNE segment followed by one UNZ segment. The count in the UNE segment must equal the number of UNH/UNT loops provided. For example, three IID declarations are reported by transmitting the UNG to UNT loop three times, the count in the UNE segment would be '3'. The count in the UNZ segment will always be transmitted as '1'.

2.4 Timeframes for Transmission of the IID

An IID can be sent to the CBSA for processing 90 days prior to the arrival of the goods at the FPOA in Canada.

An IID will be automatically cancelled if the IID is 90 days old and there is no associated cargo or if there is an associated cargo document that is in either a non-reported or non-arrived status. Effectively this means that, if no changes have been made to an IID for 90 days, and if no cargo documents referenced by that IID have been reported (or arrived), the IID will be automatically cancelled.

3 CBSA processing and validation of the IID

This section describes what processing and validation is applied to the IID, and the circumstances under which the IID will be rejected.

3.1 EDI Transmission Process

When data is transmitted to the CBSA electronically, it is processed and validated before it is accepted and notification is sent to the transmitter of the data. The following identifies the initial steps the system undergoes to receive and accept EDI data:

1. Receives data transmission(s) from the client.
2. Authenticates the sender by verifying against the sender profile which confirms if the sender is valid for the specific message standard.
3. Accepts the sender if authentication proves valid.
4. Rejects the sender if authentication proves invalid.
5. Verifies the transmission contains the appropriate number of segments.
6. Verifies the data elements in each segment are present and that the structure of the data meets syntax rules.
7. Verifies the size (min/max) and format (numeric/alphanumeric/coded values) requirements are met.
8. Verifies the segments are properly defined.
9. Verifies the segments appear in proper order.
10. Verifies the document contains the correct number of loops.
11. Converts the data to readable format for the next steps in processing.
12. Sends an electronic Acknowledgment notice to the sender if no syntax errors are found.
13. Sends an electronic Reject notice to the sender if any syntax errors are found via the same route as the incoming transmission.

3.2 IID Original Validation Process

When an IID original declaration is transmitted, the process is as follows:

1. An importer, or broker acting on behalf of the importer, transmits an IID with all of the required data elements to the CBSA.
2. The CBSA performs syntax validation on the IID.
3. If the data does not pass syntax validation, the transmission is rejected, and a Reject notice is sent to the CBSA client who transmitted the IID. The data is not stored in CBSA systems.
4. If the data passes syntax validation, the transmitter will receive an optional Functional Acknowledgement notice if their EDI profile indicates they have opted to do so, and the data is stored in CBSA systems.
5. The system performs business rules validation on the IID.
6. If the data does not pass business rule validation, the transmission is rejected and a Reject notice is sent to the client who transmitted the data. A Change/Cancel/Amend transmission must be generated to update the invalid information and continue processing.
7. The system applies business rules based on the PGA Responsible Agency Code to trigger PGA regulatory requirements and Program identification processes. (e.g. PGA Responsible Agency Code = CFIA and Commodity Identifier (CFIA AIRS) = Frozen meat from Seattle, Washington).
8. Upon PGA(s) identification, system validates IID data fields against PGA mandatory/conditional data and functional business rules as applicable and then triggers sharing of data with applicable PGA and shares data (e.g. PGA Responsible Agency Code = CFIA and Commodity Identifier (CFIA AIRS) = Frozen meat from Seattle, Washington, Send data to CFIA to make admissibility decision)
9. If the data does not pass business rule validation, the transmission is rejected, and a Reject notice is sent to the CBSA client who transmitted the data. If the Reject is PGA related, the Reject notice will indicate

that it is a PGA reject. A Change/Cancel/Amend transmission must be generated to update the invalid information and continue processing.

10. If the data passes business rule validation, the CBSA sends an Accepted notice to the CBSA client who transmitted the IID.
11. If there is related cargo or house bill data on file, the CBSA sends the applicable Completeness notices to the I/B.
12. The CBSA and/or the PGA (as applicable) process the IID transmission. Upon arrival of goods at the FPOA (manual arrival for highway mode and upon receipt of arrival message in other modes), the status of the transaction will be updated and a message will be sent to the originator and all other applicable parties in the transaction.

3.3 IID Change /Cancel/Amend Validation Process

3.3.1 IID Change Transmission

1. The I/B re-transmits the IID with the applicable Change/Cancel/Amend function code to the CBSA.
2. The CBSA performs syntax validation on the data.
3. If the data does not pass syntax validation, the transmission is rejected and a Reject notice is sent to the CBSA client who transmitted the data. The data is not stored in CBSA systems.
4. If the data passes syntax validation, the I/B will receive an optional Functional Acknowledgement notice if their profile indicates they have opted to do so, and the data is stored in CBSA systems.
5. The CBSA performs business rule validation on the data.
6. If the data does not pass business rule validation, the transmission is rejected and a Reject notice is sent to the I/B.
7. If data passes business rule validation, the CBSA sends an Accepted notice to the I/B.
8. If there is related data on file, the CBSA sends the applicable Completeness notices to the I/B.

3.3.2 IID Cancel Transmission

1. The I/B transmits a cancellation request to an IID that's in valid status in the CBSA system.
2. The CBSA system performs syntax validation of the data, and cancels complete IID on file.
3. If the IID was previously matched to other related data, the CBSA sends a notice to the transmitter of the data to which it was previously matched notifying the transmitter the documents are no longer matched.

3.3.3 IID Amend Transmission

1. Post-arrival, the I/B re-transmits to the CBSA with the applicable amendment code.
2. The CBSA performs syntax validation on the data.
3. If the data does not pass syntax validation, the transmission is rejected and a Reject notice is sent to the I/B. The data is not stored in CBSA systems.
4. If the data passes syntax validation, the I/B receives an optional Functional Acknowledgement notice if their profile indicates they have opted to do so, and the data is stored in CBSA systems.
5. The CBSA performs business rule validation on the data.
6. If the data does not pass business rule validation, the transmission is rejected and a Reject notice is sent to the I/B.
7. If data passes business rule validation, the CBSA sends an Accepted notice to the I/B.

4 Client requirements and service channels

This section describes what the importer or broker must have access to in order to submit the IID.

4.1 System Pre-requisites

The following are a few key items that CBSA clients must be aware of when transmitting an IID to the CBSA:

1. CBSA clients may transmit an IID through EDI using UN/EDIFACT GOVCBR in EDIFACT format.
2. For clients to transmit information regarding document images, clients must have the ability to submit a reference to an image that is accessible to appropriately cleared CBSA and PGA staff.
3. Client systems using EDI must have systems available to translate UN/EDIFACT data into the standard format of their business application.

4.2 IID Delivery Channels

The CBSA will offer the IID via the EDI system. Plans for development of an Enterprise Portal (ePortal) option are underway at the CBSA. Upon its implementation, anticipated for 2015/2016, IID transmissions will be able to be made via this option. Details regarding its use will be provided as ePortal development rolls out.

The options for transmission of EDI to CBSA's host system for furtherance to PGA programs for processing are as follows:

4.2.1 VAN (Value Added Network)

A VAN is a public EDI network which provides an opportunity to exchange EDI transactions with a large number of trading partners using a single communication interface. VANs generally offer a wide range of EDI services. Clients will be responsible for the payment of their VAN connection and membership fees as well as for the transmission of their messages through the VAN to the CBSA. A list of VANs is available upon request from the TCCU.

4.2.2 Third Party Service Provider

There are a variety of approved third party service providers who currently transmit data to the CBSA, using a variety of different communication modes. A list of EDI capable service providers is available at <http://www.cbsa.gc.ca/eservices/sp-fs/service-eng.html>.

4.2.3 Customs Internet Gateway (CIG)

The CBSA developed the CIG to provide clients a method to transmit and receive data over the internet. A Public Key Infrastructure (PKI) provides for the security and integrity of the data. Clients are required to purchase the Entrust software for encryption and decryption and to develop or purchase the protocol software to connect to the CIG. Clients will need to transmit the data from a Canadian office as the certificate is only assigned to a device in Canada.

4.2.4 Direct Connect

The Direct Connect is an alternative that provides clients with a direct connection to CBSA. This communication method requires an initial investment as well as annual maintenance fees.

The CBSA does not endorse any particular service and its responsibility is limited to making this information available to our EDI partners. Decisions on transmission services are the responsibility of the transmitters and any agreements to purchase software and/or services is strictly between the vendor and the transmitter. The transmitter is responsible for all transmission costs to the CBSA.

For additional information on CBSA services please see <http://www.cbsa-asfc.gc.ca/eservices/comm-eng.html>

4.3 Registration Requirements

To be able to transmit IID to the CBSA and receive notification regarding them, CBSA clients must register with the CBSA to become EDI clients and to set up a profile that will enable them to send and receive data. System testing will then be performed to ensure the successful transmission and receipt of data. For further information on becoming an EDI client and the EDI registration process for sending data, clients can contact the TCCU, or visit the CBSA website at <http://cbsa-asfc.gc.ca/eservices/procedure-eng.html>

5 Reliability of CBSA system

The CBSA systems are designed to provide clients with a safe and secure environment in which to transmit their data.

5.1 Security

Each trading partner must undertake all steps necessary to prevent unauthorized access to and use of any portion of the EDI transmission that is in their control. In addition, I/Bs must comply with the security procedures as outlined in the instruction manual.

The CBSA will use dedicated lines to those trading partners who use VANs or who have Direct Connect. These lines will have audit trails and password protection within the CBSA. The same audit trails and password protection is used for trading partners who use CIG and third party service providers.

5.2 Confidentiality

Each trading partner must protect the confidentiality of information of the other trading partner.

5.3 Authorization

Each trading partner takes responsibility for controlling access by its employees to the EDI System. It is assumed that any message received by the CBSA would have been properly processed and authorized by the trading partner.

5.4 Authentication

Authentication refers to each transmission incorporating criteria permitting the receiver to verify that it is an authentic declaration of the sender. A password will be incorporated in the functional group segment for this purpose.

In addition, each trading partner will follow the authentication procedures specified in their respective trading partners list of instructions or instruction manual.

5.5 Incomplete, Inaccurate or Corrupted Documents

The risk of an undetectable error in transmission lies with the sender. The client is responsible for the cost and maintenance of their data, either through an agreement with their trading partner or through their own facility. The CBSA is not responsible either for lost data or the cost of the retransmission of lost data.

6 GOVCBR/UN EDIFACT Message Implementation Guide (MIG) Instructions

The CBSA IID aligns with the GOVCBR message structure. For the mapping instructions, the ECCRD contains appendices, one of which is the GOVCBR/UNEDIFACT Message Implementation Guide (MIG). The MIG illustrates the IID message structure, segments and sample messages.

The detailed instructions within the segment guide of the MIG will convey the CBSA and PGA mandatory, conditional and optional rules for all data elements that are required to import all regulated and controlled commodities. For PGA program specific mandatory/conditional and optional rules and instructions, including required code table information, pertaining to transmitting of the IID data, it will be necessary to refer to the PGA program specific appendices contained within the document.

The following information is being provided to illustrate how to interpret the information within the MIG and the PGA specific appendices.

6.1 Headers

The message structure begins with standard EDI header and footer information as per example below and uses a standard hierarchical structure in order to collect applicable raw EDI data.

0000	1	UNB	M	1	0	Interchange header
0000	2	UNG	M	1	0	Functional group header
0010	3	UNH	M	1	0	Message header
0020	4	BGM	M	1	0	Beginning of message
6470	86	HYN	M	1	0	Hierarchy information
11100	87	UNS	M	1	0	Section control
11130	88	UNT	M	1	0	Message trailer
0000	89	UNE	C	1	0	Functional group trailer
0000	90	UNZ	M	1	0	Interchange trailer

6.2 Segment Guide

The GOVCBR/UNEDIFACT message maps contain a number of information columns for each data element. The function and the values of the columns are illustrated below.

Counter/Number/Tag Header

Counter No	Tag	St	MaxOcc	Level	Name
0290	SG7	M	99	1	Declaration /Secondary Notify Parties
0300	10 NAD	M	1	1	Declaration/SNP Party Identification

6.2.1 Tag

Every GOVCBR group (a group of associated segments) is assigned an “**SG**” (i.e. “Segment Group”) number for reference purposes. The group number, in this example **SG7**, identifies the relevant section within the GOVCBR message structure. These group numbers are not transmitted within the message and are provided for reference purposes only. This is the first item noted in the “Tag” header column.

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha “Tag” for reference purposes; in this example the segment tag is **NAD**. The tags are defined within the EDIFACT data element directories. Unlike the segment group numbers, it should be noted that each tag is transmitted within the EDI messages, in the defined order.

6.2.2 Counter

This field appears before the Tag and identifies the Group and Segment position within the EDIFACT message structure. The Segments are numbered in ascending values of 10 for each occurrence of a segment in the message structure. These ascending values of 10 are noted in the “**Counter**” column and indicate the position within the overall GOVCBR message structure. Since the GOVCBR has many hundreds of segments, it is possible for many unused segments to be skipped. Therefore the counter will not appear to be consecutively sequential.

6.2.3 Segment Number

The segment count for each individual message map however is consecutively sequential and is indicated in the “**No**” column. This provides a running count of each sequential segment within the map.

6.2.4 Group/Segment Status

“**St**” indicates the status of the Segment Group and of the Segment itself within the group. Values are:

M - Mandatory group or segment: must always be transmitted.

C - Conditional group or segment: transmitted if condition for this group or segment applies.

6.2.5 Maximum Usage

“**MaxOcc**” indicates the maximum number of occurrences for the respective group and respective segment.

“**Level**” indicates the ‘tree’ position within the Message Structure.

6.2.6 Name

The “Name” on the SG line reflects the CBSA name for the group in which the segment occurs (if applicable). The UN/EDIFACT Name of the segment is then provided.

In the above example; the SG7 is shown as Mandatory with a Max occurrence of 99, the SG Tag Name “**NAD**” is shown as Mandatory with Max occurrence of 1. This means that SG7/NAD is Mandatory. The entire SG7/NAD must be provided once and can be repeated an additional 98 times (maximum 99) to provide additional NAD information.

6.2.7 Data Element Name

This column provides the name of the CBSA Segment, Composite, Component or Simple Data elements, derived from the UN/EDIFACT directories.

6.3 Tag Segment/Element Segment Id

UN/EDIFACT Definitions EDIFACT GOVCBR Standard Syntax				CBSA Implementation Business Application Attributes		
Tag	Name	Pos Place	St Forma	St	Format	Usage / Remark
NAD						
3035	Party function code qualifier	010	M an..3	M	an..3	<p>CB Customs broker Private individuals, partnerships, associations of corporations who are Licenced and regulated by the CBSA to assist importer and exporters in meeting requirements governing imports and exports. Customs brokers transmit necessary information and appropriate payments to the CBSA on their client's behalf.</p> <p>.</p> <p>IM Importer An individual or business that imports commercial goods into Canada. The party responsible for the importation of the commodity</p> <p>.</p> <p>AE Declarant's agent/representative The party responsible for submitting the declaration on behalf of an importer and must be provided if different than the CBSA account security holder.</p> <p>.</p> <p>DDD Applicant The party which applied for the LPCO. The party applying for a permit(s) as part of this declaration. Depending upon the PGA, this party may be required to be a resident of Canada; refer to relevant PGA appendix.</p> <p>.</p> <p>HQ Account owner The party responsible for paying PGA fees. See CFIA appendix for details.</p> <p>.</p> <p>FW Freight forwarder An agent ((including the de-consolidators and pool car operators) who arranges for the transportation of goods and who may provide other services such as group and consolidating shipments, de-stuffing containers, Customs brokerage and warehousing.</p> <p>CA Carrier WH Warehouse keeper</p>
C082	Party identification details	020	C	C		
3039	Party identifier	2	M an..35	M	an..15	<p>The unique (to CBSA or a PGA) identifier for this party which may be used for identification purposes (e.g., BN) and/or for purposes of sending third party status notifications regarding this declaration.</p> <p>.</p> <p>IM parties (importers) must provide their 15-digit CRA-issued business number (BN)</p> <p>.</p> <p>AE, CB parties (agents or brokers) must provide their CBSA-issued account security number if different than that provided in the transaction number.</p> <p>.</p> <p>CA, FW parties (carriers or freight forwarders) must provide their CBSA-issued carrier code.</p> <p>.</p> <p>WH parties (warehouse keepers) must provide their CBSA-issued sub-location/warehouse code.</p>

Remark:

CRA-issued business number must be provided for importers.

Example:

NAD+AE+X+X : X : X+X : X : X+X+ON++AD'

The "Tag" column of the map below the header identifies the alphanumeric or numeric identifier of each of the UN/EDIFACT segments and data elements. In the example above **NAD** is the Tag. There are three (3) types of data elements defined. Descriptions of each are provided below. It should be noted that the Element IDs are not transmitted within the message; only the value of the data element is transmitted in the appropriate position within the segment.

COMPOSITE DATA ELEMENT NAME: Identifies a high level name of a set of associated data elements. The associated data elements are referred to as "component" data elements. Composites are identified by a single alpha character (C or S) followed by 3 unique digits and will appear left-justified within the column. **C082** is a Composite data element within above example

COMPONENT DATA ELEMENT: Identification of a component data element which is part of a composite data element. Component data elements are identified by 4 unique digits. This value will appear indented under its respective composite data element.

SIMPLE DATA ELEMENT NAME: Name of a unique/individual data element within a segment, a "simple" data element contains one element for a single function/use. Simple data elements are identified by 4 unique digits and will appear left-justified within the column. **3039** is the simple Data element within the C082 Composite.

6.3.1 Segment/Element Position/Placement

This column of the map identifies the Segment or Element position within the EDIFACT message structure. The Element position numbers identify the position of a data element within a segment. In the EDIFACT documentation the Composite data elements and Simple data elements are numbered in a segment using 3-digit numbers. They are assigned ascending values of 10 for each occurrence of a composite or simple data element. Only the data elements used will display a number. In the example above, **C082** is the second element in the segment and is thus assigned a value of **020**.

To more specifically identify the data element positions, each Composite is assigned an incrementing number. Within each composite, the component data elements are assigned a sequential subordinate number that represents the actual field placement on the line, regardless of the syntax separator used. This will be indicated in the map as a single number with no leading zeros. Only the component data elements of a composite will display the actual position number on the line. Otherwise the 3-digit position will be displayed alone, for example: component **DE 3039** is assigned Place **2**

6.3.2 Status

Depending on the message requirement, different rules of "mandatory" or "conditional" use of a data element may apply. In addition, a hierarchy of rules applies; if a segment or composite data element is conditional but it is used (based on the condition) some of the subordinate elements may be mandatory. In addition to the status, some segments may be repeated more than once within a message.

- M - Mandatory element: must always be transmitted.
- C - Conditional element: is transmitted if condition for this element applies.

6.3.3 Format Column #1

The attributes of data type and maximum size for syntactical purposes are defined in this column. These are described using an EDIFACT standard of definition as follows:

- a** = Alpha characters (a to z)
- n** = Numeric characters (0 to 9)
- an** = Alphanumeric characters (a to z, 0 to 9, plus special characters)
- ..** = Two periods indicate a variable length field or else it is a fixed length field

Examples:

a5 = alpha must be 5 in length

a..5 = alpha up to 5 in length

n15 = numeric must be 15 in length

an..12 = alpha numeric up to 12 in length

an9..15 = alpha numeric, must be minimum 9 characters, up to 15 allowed

6.3.4 Format Column #2

This column is used to define any differences that exist between the max size in Column #1 for syntax versus CBSA business application storage and processing purposes. Where differences in size/type are provided in Column #2, they supersede Column #1.

6.3.5 Usage/Remarks

This column provides the details of the content of the data element, the expected values/codes or the applicable application data element to be supplied. In the case of Date/Time data elements, the format of the date/time is also defined.

This column also provides notes and/or descriptions on the Segment Groups, Segments and individual data elements. It will also identify the application data elements associated with the EDIFACT data elements. In many cases mandatory EDIFACT codes are used to qualify the data element being supplied. In these cases, the descriptions of the EDIFACT code values are provided.

Remark

This field at the bottom may provide overall information regarding the use of the segment within the message map, such as the identification of a business rule.

Example

A sample of the completed segment line is provided. Note that standard EDIFACT syntax rules concerning separators apply; refer to <http://www.unece.org/trade/untdid/texts/d423.htm>

6.4 PGA Program Specific Appendices:

The MIG provides the CBSA detailed requirements and references to PGAs with high level instructions regarding their program specific requirements. For the PGA Program specific, commodity related regulatory requirements, it will be necessary to refer to PGA Program specific Appendices within the document to provide the detailed mandatory/conditional and optional rules and instructions for commodities regulated by PGAs.

Below you will find an example of a PGA Specific appendix for CFIA commodities, including instructions on how to interpret the additional information contained within.

Appendix XX (Indicates Appendix Reference)

CANADIAN FOOD INSPECTION AGENCY

ALL PROGRAMS (indicates the PGA name and specific program(s) that the commodity (ies) is/are regulated by)

Program Description

Brief Description of Program requirements including links to applicable legislative and regulatory requirements.

Applicable HS Codes (Provides information on HS Codes and/or HS Code ranges applicable to this appendix)

Data Element Rules/Conditions (Provides MIG Directions)

IID Segment & Tags Referenc es the main MIG position	Data Element Name References the Business Glossary Name	PGA Element Definition References the PGA equivalent to Business Glossary Definition	Data Element Status (for CFIA)	Data Element Rules & Conditions	Qualif ier	Codes
SG7 NAD (Q) 3035 C082 (E) 3039	CFIA Account Number	CFIA Account Number	C (conditional because fees are not always charged)	The CFIA account number for the payment of CFIA processing fees. If provided, only provide one occurrence per transaction.	HQ (value for Q 3035)	
SG7 NAD (Q) 3035 C080 (E) 3036	CFIA Payer Name	CFIA Name of Payer	C	The name of the payer associated with the CFIA account being used for CFIA processing fees must be provided if an account number is provided.	HQ	

If we refer back to the Main MIG at SG7.NAD 3035, instructions as follows will have been included:

HQ Account owner
The party responsible for paying PGA fees. See CFIA appendix for details.

Within the CFIA appendix above, the definitions and details to meet the requirements to transmit this CFIA specific mandatory field within the IID for SW processing can be found. Thus, the first row directs importers that for CFIA goods it is conditional to provide the following if fees are expected:

At SG7 NAD

3035 Qualifier = HQ

C082 3039 = The CFIA Account Number for the Payment of CFIA processing fees (format an..15)

E.g.: NAD+HQ+123456789876554

Presuming that an account number was provided, it is then mandatory to provide a Payer Name (the second row) as the description text indicates [... must be provided if an account number is provided]. Thus the importer must augment the above line to include:

At SG7 NAD

3035 Qualifier = HQ

C080 3036 = The payer name associated with the account

E.g.: NAD+HQ+123456789876554++John Doe

7 Notices

Existing CBSA notice functionality is being enhanced to provide more concise error information, such as larger free text fields so that officers can provide more detailed textual information and fields to indicate which PGA(s) have issued error(s) and where in the original transaction those errors occurred. New notices (delivered by sub-statuses on the IID Response message) are being introduced for PGAs to provide information specific to the status of PGA documents.

The following Notices are specific to the IID:

- **SWI - IIDREJ** - This notice identifies SWI rejects for both the IID and the LPCO (e.g. Missing PGA Data, Incorrect LPCO Data etc.). On the notice a code identifies whether the reject was from the CBSA or a PGA (e.g. 5 = CBSA, 1 = CFIA etc.)
- **TRQ Notices** - For goods that are subject to quota management, such as agricultural products and clothing/textiles (regulated by GAC), the application for approval of a permit and as a result a preferred rate for duty, can be submitted on the IID. The Tariff Rate Quota (TRQ) notice will be generated for pre-arrival transactions to advise Importers/Brokers if their application submitted on the IID was approved or not. If approved the Permit number will be included in the free text portion of the notice by GAC.
- **Preferential quota rate accepted**
 - The tariff quota rate referred to by the IID has been accepted by the PGA responsible for supply management of the commodity. This can be a result of many business processes including, but not limited to: a shipment-permit application being successful, a permit reference (whether GIP or not) being deemed appropriate or an alternative quota quantity application being successful.
- **Preferential quota rate rejected**
 - The tariff quota rate referred to by the IID has been rejected by the PGA responsible for supply management of the commodity. Please refer to SG17 for more detailed error codes associated to this rejection. If the decision has not changed on the quota rate permit request by the time the IID reaches acquitted status, the default tariff rate(s) will apply.

All Other Notices

Important to Note that with the exception of the Notices specific to the IID, which are explained above, ALL notices and new notice functionality implemented with the eManifest Program/System will apply to the IID. For example, matching Notices, Secondary Notify Party Functionality etc. Please refer to the link below to obtain more information on the eManifest Notices and the status of the implementation of those notices.

<http://www.cbsa-asfc.gc.ca/prog/manif/requirements-exigences-eng.html>

For information pertaining to RNS, including technical information, please refer to Release Notification Client Document at the following <http://www.cbsa-asfc.gc.ca/eservices/eccrd-eng.html>.

For details and technical information regarding eManifest Notices, please refer to ACI/eManifest Notices ECCRD at the following <http://www.cbsa-asfc.gc.ca/eservices/eccrd-eng.html>.

NOTE: For technical specifications in GOVCBR UN/EDIFACT format, please refer to Appendix C of this document.

8 Reporting of Multiple Cargo Control Numbers (CCNs)

The IID allows a single EDI release transaction to contain multiple Cargo Control Numbers (CCNs). The business rules for reporting multiple CCN(s) on the IID are as follows:

1. A minimum of one CCN must be referenced on the IID
2. If the IID is submitted with a single CCN, the single CCN must be referenced at the Declaration level of the IID².
3. If the IID is submitted with multiple CCNs, the CCNs must be reported at the Invoice level of the IID³.
4. All CCNs referenced on an IID must be non-consolidated documents.
5. All CCNs referenced on an IID submitted pre-arrival must arrive at the First Point of Arrival in the same conveyance.
6. If one CCN on the IID is referred for further processing or examination by the CBSA, the entire release and all CCNs associated to the IID will be referred.

² Refer to Appendix A IID EDIFACT Inbound Message Implementation Guide for details, in the header RFF segment

³ Refer to Appendix A IID EDIFACT Inbound Message Implementation Guide for details, in the SG47.RFF segment

Appendix A: IID EDIFACT Inbound MIG

This EDIFACT Message Implementation Guide (MIG) describes the structure and composition of an inbound message to the CBSA, with selected samples of transactions.

A1. Message Structure

7008	Item description	6	C an..256	C an..256	<p>Uncoded Characteristic Use this field to provide a free-text (uncoded) value for the selected qualifier. PGA appendices describe whether a characteristic qualifier is intended to be coded or free-text.</p> <p>If this segment is qualified with an 8 (Product), this field is used for providing a commercial description of the product.</p>
------	------------------	---	-----------	-----------	--

Remark:

This segment is used to provide both coded and non-coded (free-form) characteristics of the commodity being imported. Many PGAs have specific characteristics that must be reported for commodities regulated by them; refer to PGA appendices for requirements.

This segment should be repeated for additional characteristics as required.

There must be at least one occurrence of this segment with a qualifier of 8, containing a commercial description of the product being imported for CBSA purposes.

Example:

IMD++8+:::personal effects'

No = Consecutive segment number
 MaxOcc = Maximum occurrence of the segment/group
 Counter = Counter of segment/group within the standard

C528	Commodity/rate detail	030		C		M		
7357	Commodity identification code	3		C	an..18	M	an..18	Classification Provide the required classification code for this commodity.
1131	Code list identification code	4		C	an..17	M	an..3	Classification Type Qualify the type of classification being provided in this field using one of the following: HS HS Code (Harmonized System) The 10 digit harmonized classification number (as per the tariff in effect where the declaration was filed) for the commodity being described in this occurrence of SG117.

Remark:

This segment is used to provide any commodity classification codes required by PGAs or the CBSA. See PGA annexes for specific requirements. The CBSA requires that a single 10-digit Harmonized System (HS) code be provided for each commodity line (that is, occurrence of SG117) for valuation and other classification purposes.

A classification refers to a code that describes the category into which a product belongs and is not intended to precisely identify it, only generalize its' characteristics.

Example:

TCC+++1234567890:HS'

5370 **SG119** C 99 4 **Manufacturer / Commodity Party**

Identification information for the entity that last manufactured, assembled, produced, grew or harvested the commodity or (for manufactured goods) the identification information of the supplier of the finished goods in the country from which the goods are leaving.

This segment group can also be used to specify parties of interest to PGAs (Delivery Parties/Destinations or Ultimate Consignees/End Users) at the commodity line level.

Parties specified in this segment are assumed to "override" (i.e., be assumed to be more accurate than) any party with the same qualifier specified at the GAGI (SG102) level for this commodity line. This is different behaviour from parties that are provided at the invoice line (DP & UC), which add additional parties of interest.

A3.2 Transport Canada RIV – Vehicle for Parts

NOTE : For presentation purposes the EDIFACT messages are displayed as one segment per line. A file containing an actual EDIFACT message would start each new segment after the single quote termination character. No "carriage return" control characters would be included.

This sample message defines an "original" IID PARS for a shipment of Used Vehicles that are destined to be used for Parts in Canada with the following attributes:

- All mandatory data elements are provided including conditional elements that are mandatory for TC purposes.
- Message contains one invoice (SG 47) with 2 Manufacturers (SG 101) and 3 Invoice Lines (SG 117).
- Includes only mandatory parties:
 - Importer name and address
 - Vendor name and address
 - Manufacturer name and address
- Includes 1 Declaration level permit reference for a Case by Case reference number applicable to the entire shipment of goods.
- The importer has indicated that they want French versions of the TC documents.
- Country of Origin reported at the invoice level
- No packaging details reported

For each commodity the following details are provided:

- HS Code
- Vehicle production date and model year.
- VIN as per TC requirements.
- Product Categories for Vehicle and Title Status.
- Commercial description
- Vehicle Body Type(Class)
- Trade Name/Make of vehicle
- Model name of Vehicle
- Unit cost of the vehicle.
- Unit count, number of vehicles for parts.
- A compliance statement to comply with TC requirements.

LPCO requirement for each commodity include:

- Document Image references if applicable
- Case by Case number for a specific commodity

A3.3 Transport Canada with a Mixed Shipment

NOTE : For presentation purposes the EDIFACT messages are displayed as one segment per line. A file containing an actual EDIFACT message would start each new segment after the single quote termination character. No "carriage return" control characters would be included.

This sample message defines an "original" IID PARS for a mixed shipment of vehicles. This is a mixed shipment of used cars and salvage cars being imported for parts. There are two different import requirements for the goods as per the TC appendices for vehicle imports. Each vehicle requires a compliance statement indicating that it meets TC requirements. The used vehicle also includes a case by case number to indicate that it is eligible for import into Canada.

- All mandatory data elements are provided including conditional elements that are mandatory for TC purposes.
- Message contains one invoice (SG 47) with 2 Manufacturers (SG 101) and 4 Invoice Lines (SG 117).
- Includes only mandatory parties:
 - Importer name and address
 - Vendor name and address
 - Manufacturer name and address
- Country of Origin reported at the commodity level when different than the invoice level Country of Origin.
- No packaging details reported

For each commodity the following details are provided:

- HS Code
- Vehicle production date and model year.
- VIN as per TC requirements.
- Product Categories for Vehicle and Title Status.
- Commercial description
- Vehicle Body Type(Class)
- Trade Name/Make of vehicle
- Model name of Vehicle
- Odometer reading for used vehicles
- Unit cost of the vehicle.
- Unit count, number of vehicles for parts.
- A compliance statement to comply with TC requirements.

LPCO requirement for each commodity include:

- Document Image references if applicable
- Case by Case number for a specific commodity

A3.4 Health Canada with Natural Health Products

NOTE : For presentation purposes the EDIFACT messages are displayed as one segment per line. A file containing an actual EDIFACT message would start each new segment after the single quote termination character. No "carriage return" control characters would be included.

This sample message defines an "original" IID PARS for a shipment of Natural Health products with detailed packaging requirements. For this example the product packaging has been reported at three levels. The retail box for the packaging is considered the outer level, the intermediate packaging is the foil packet housing the capsules, and the innermost packaging is the medicine capsules.

All mandatory data elements are provided including conditional elements that are mandatory for HC purposes.

- Message contains one invoice (SG 47) with one manufacturer (SG 101) and 2 Invoice Lines (SG 117).
- Includes the following parties:
 - Importer name and address including full contact details for the company and representative.
 - Broker name and address including full contact details for the company and representative.
 - Vendor name and address
 - Exporter name and address if different then vendor
 - Delivery Destination
 - Manufacturer name and address
- Includes two Declaration level permits for a site license number and a natural product authorization number.
- Country of Origin reported at the invoice level
- Commodity packaging reported at the lowest level.

For each commodity the following details are provided:

- HS Code
- Commercial description
- Brand Name/Product Name
- Intended Use Code
- Batch/Lot Number
- Production Date
- GS1 Identifier
- Product Group Code
- Unit Price
- Unit count
- Three levels of commodity packaging (Inner, Intermediate, Outer)

A3.5 CFIA and GAC with Multiple Delivery Parties

NOTE : For presentation purposes the EDIFACT messages are displayed as one segment per line. A file containing an actual EDIFACT message would start each new segment after the single quote termination character. No "carriage return" control characters would be included.

This sample message contains multiple chicken related commodities that are regulated by CFIA and GAC. The goods in the shipment come from multiple manufacturers and are destined to different locations within Canada. The shipment also contains a wood pallet that requires a wood packaging statement for CFIA.

The first invoice contains one commodity line where the commodity will be delivered to one location (the delivery party). This commodity also has reporting requirements for CFIA and GAC goods. Country of Origin is reported at the Invoice level as everything on the invoice is from the same source.

The second invoice contains two commodity lines where the commodities will be delivered to two different locations (the Delivery Party at the commodity level). This commodity also has reporting requirements for CFIA and GAC goods. Country of Origin is reported at the Invoice level and the commodity level as the commodities are not from the same US location. A WPI statement is required on the first commodity line to indicate that the wood used in the packaging meets the CFIA Wood packaging requirements.

This sample message defines an "original" IID PARS with the following attributes;

- All mandatory data elements are provided including conditional elements that are mandatory for PGA purposes.
- Commodity has requirements for multiple PGAs.
- Message contains two invoices (SG 47) with 1 Manufacturer per invoice (SG 101) and three Invoice Lines (SG 117).
- Includes only mandatory parties:
 - Importer name and address
 - CFIA Account Owner (HQ)
 - DFAIT Account Number (DDD)
 - Vendor name and address
 - Delivery Party name and address
 - Manufacturer name and address
 - Delivery Party name and address
- Country of Origin reported at the invoice and commodity level.
- Multiple packaging types including a wooden pallet that also requires a statement for CFIA purposes.

Each commodity on the invoice consists of the following details:

- HS Code
- Commercial description
- Batch/Lot number of the commodity
- Unit and Total cost of the commodity
- Unit count of the commodity
- Unit Weight of the commodity
- CFIA AIRS Code and related data elements as per CFIA AIRS system
- A compliance statement to comply with GAC requirements

LPCO requirement for each commodity include:

- Meat Inspection Certificate number and digital attachment location.
- Alternate Quantity for reporting GAC requirements

A3.6 Multiple PGAs and Multiple Invoices

NOTE: For presentation purposes the EDIFACT messages are displayed as one segment per line. A file containing an actual EDIFACT message would start each new segment after the single quote termination character. No "carriage return" control characters would be included.

This sample message defines an "original" IID PARS for a mixed shipment of goods. Due to the multiple goods involved there are five different government agencies involved in the shipment. The shipment consists of **three** invoices, **eight** distinct manufacturers, and **14** distinct commodities. The entire shipment of goods will be delivered to the Importers address.

The first invoice contains various types of produce for immediate sale within Canada (CFIA Requirements). The produce comes from 3 different regions including the United States which also requires the state of origin. For each new country of origin or producer a new Government Agency Goods Item (GAGI) level is used. In this example only one commodity comes from each producer so each GAGI level also include one commodity level under it. The shipment uses wood pallets so a Wood Packaging statement is also required. There are three distinct commodity lines for this invoice.

The next invoice contains various articles of clothing (GAC requirements). All of the clothing falls under the same HS Code however the material origins may differ and the clothing descriptions are different. This invoice includes two clothing manufacturers that are producing the same types of clothing. There are 6 commodity lines that cover the various articles of clothing.

The last invoice contains a shipment of Tires (TC requirements). This shipment involves 3 different manufacturers of similar items. There are 9 unique commodity lines for this invoice.

This sample message defines an "original" IID PARS with the following attributes;

- All mandatory data elements are provided including conditional elements that are mandatory for PGA purposes.
- Commodity has requirements for multiple PGAs.
- Message contains two invoices (SG 47) with 1 Manufacturer per invoice (SG 101) and three Invoice Lines (SG 117).
- Includes only mandatory parties:
 - Importer name and address
 - CFIA Account Owner (HQ)
 - DFAIT Account Number (DDD)
 - Vendor name and address
 - Manufacturer name and address
- Country of Origin reported at the invoice level.
- Multiple packaging types including a wooden pallet that also requires a statement for CFIA purposes.

Each commodity on the invoice consists of the following details:

- HS Code
- Commercial description
- Unit and Total cost of the commodity
- Unit count of the commodity
- Unit Weight of the commodity
- CFIA AIRS Code and related data elements as per CFIA AIRS system if applicable.
- GAC component country of origin for clothing requirements.
- TC Tire requirements including a compliance statement.

A3.6.1 EDIFACT Message

Appendix B: Inbound MIG PGA Appendices

In the following appendices, the usage of (Q) and (E) within the IID Segment & Tags columns refers to Qualifier and Segment respectively.

B1. Canadian Food Inspection Agency

B1.1 All Programs

B1.1.1 Program Description

The CBSA assists the Canadian Food Inspection Agency with respect to the administration and enforcement of Acts and Regulations governing the import of food, plants, animals and related products.

Legislative references

- *Agriculture and Agri-Food Administrative Monetary Penalties Act,*
- *Canada Agricultural Products Act,*
- *Canadian Food Inspection Agency Act,*
- *Consumer Packaging and Labelling Act,*
- *Feeds Act,*
- *Fertilizers Act,*
- *Fish Inspection Act,*
- *Food and Drugs Act,*

B2. Canadian Nuclear Safety Commission

B2.1 Import Program (Nuclear Substances and Equipment)

B2.1.1 Program Description

The CBSA assists the Canadian Nuclear Safety Commission with respect to the administration and enforcement of Acts and Regulations governing the import of nuclear substances, prescribed nuclear equipment and prescribed nuclear information.

Legislative References:

Nuclear Safety and Control Act and regulations set out under the Act

Applicable HS Codes	Code Value	Description	Categorization (Referred to in the Commodity Characteristic Fields)
		2612.10	URANIUM ORES AND CONCENTRATES
	2612.20	THORIUM ORES AND CONCENTRATES	CONTROLLED NUCLEAR SUBSTANCE
	2844.10	NATURAL URANIUM AND ITS COMPOUNDS	CONTROLLED NUCLEAR SUBSTANCE
	2844.20	ENRICHED URANIUM AND PLUTONIUM AND THEIR COMPOUNDS	CONTROLLED NUCLEAR SUBSTANCE
	2844.30	DEPLETED URANIUM AND THORIUM AND THEIR COMPOUNDS	CONTROLLED NUCLEAR SUBSTANCE
	2844.40	OTHER RADIOACTIVE ELEMENTS AND ISOTOPES ETC.; RESIDUE	NUCLEAR SUBSTANCE
	2844.50	SPENT (IRRADIATED) FUEL ELEMENTS (CARTRIDGES) OF NUCLEAR REACTORS	CONTROLLED NUCLEAR SUBSTANCES
	2845.10	HEAVY WATER (DEUTERIUM OXIDE)	CONTROLLED NUCLEAR SUBSTANCE
	2845.90	OTHER ISOTOPES, INORGANIC OR ORGANIC COMPOUNDS OF ISOTOPES	NUCLEAR SUBSTANCE
	8401.10	NUCLEAR REACTORS	NUCLEAR EQUIPMENT
	8401.20	MACHINERY AND APPARATUS FOR ISOTOPIC SEPARATION AND PARTS THEREOF	NUCLEAR EQUIPMENT

Applicable UNDG Codes

Code Value	Description
2908	RADIOACTIVE MATERIAL, EXCEPTED PACKAGE – EMPTY PACKAGING
2909	RADIOACTIVE MATERIAL, EXCEPTED PACKAGE - ARTICLES MANUFACTURED FROM NATURAL URANIUM OR DEPLETED URANIUM OR NATURAL THORIUM
2910	RADIOACTIVE MATERIAL, EXCEPTED PACKAGE - LIMITED QUANTITY OF MATERIAL
2911	RADIOACTIVE MATERIAL, EXCEPTED PACKAGE - INSTRUMENTS OR ARTICLES
2912	RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY (LSA-I), NON-FISSILE OR FISSILE EXCEPTED
2913	RADIOACTIVE MATERIAL, SURFACE CONTAMINATED OBJECTS (SCO-I OR SCO-II), NON-FISSILE OR FISSILE-EXCEPTED
2915	RADIOACTIVE MATERIAL, TYPE A PACKAGE, NON-SPECIAL FORM, NON-FISSILE OR FISSILE-EXCEPTED
2916	RADIOACTIVE MATERIAL, TYPE B(U) PACKAGE, NON-FISSILE OR FISSILE-EXCEPTED
2917	RADIOACTIVE MATERIAL, TYPE B(M) PACKAGE, NON-FISSILE OR FISSILE-EXCEPTED
2919	RADIOACTIVE MATERIAL, TRANSPORTED UNDER SPECIAL ARRANGEMENT, NON-FISSILE OR FISSILE-EXCEPTED
2977	RADIOACTIVE MATERIAL, URANIUM HEXAFLUORIDE, FISSILE
2978	RADIOACTIVE MATERIAL, URANIUM HEXAFLUORIDE, NON-FISSILE OR FISSILE-EXCEPTED
3321	RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY (LSA-II), NON-FISSILE OR FISSILE EXCEPTED
3322	RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY (LSA-III), NON-FISSILE OR FISSILE EXCEPTED
3323	RADIOACTIVE MATERIAL, TYPE C PACKAGE, NON-FISSILE OR FISSILE-EXCEPTED
3324	RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY (LSA-II), FISSILE
3325	RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY, (LSA-III), FISSILE
3326	RADIOACTIVE MATERIAL, SURFACE CONTAMINATED OBJECTS (SCO-I OR SCO-II), FISSILE
3327	RADIOACTIVE MATERIAL, TYPE A PACKAGE, FISSILE, NON-SPECIAL FORM
3328	RADIOACTIVE MATERIAL, TYPE B(U) PACKAGE, FISSILE
3329	RADIOACTIVE MATERIAL, TYPE B(M) PACKAGE, FISSILE
3330	RADIOACTIVE MATERIAL, TYPE C PACKAGE, FISSILE
3331	RADIOACTIVE MATERIAL, TRANSPORTED UNDER SPECIAL ARRANGEMENT, FISSILE
3332	RADIOACTIVE MATERIAL, TYPE A PACKAGE, SPECIAL FORM, NON-FISSILE OR FISSILE EXCEPTED
3333	RADIOACTIVE MATERIAL, TYPE A PACKAGE, SPECIAL FORM, FISSILE

Glossary of Terms	<p>CNSC Device Certificate: a document issued by the Commission or a designated officer authorized under paragraph 37(2)(a) or (b) of the Nuclear Safety and Control Act, indicating that prescribed equipment is certified.</p> <p>CNSC Licence: a licence issued under section 24 of the Nuclear Safety and Control Act, which authorizes activities, described in section 26 of the Act, including the import of nuclear substances, prescribed equipment or prescribed information. A licence may be issued by the Commission or a Designated Officer.</p>

B3. Environment and Climate Change Canada (formerly Environment Canada)

B3.1 Waste Reduction & Management Division

B3.1.1 Program Description

In Canada, all three levels of government contribute to environmental protection and have a role to play in managing hazardous wastes and hazardous recyclable materials.

- Municipal governments are responsible for establishing collection, recycling, and disposal programs within their jurisdictions.
- Provincial and territorial governments establish measures and criteria for licensing hazardous-waste generators, carriers, and treatment facilities, in addition to controlling movements of wastes within their jurisdictions.
- The federal government regulates trans-boundary movements of hazardous wastes and hazardous recyclable materials, in addition to negotiating international agreements.

Legislative references

- *Under the Canadian Environmental Protection Act, 1999 (CEPA 1999), ECC's Waste Reduction and Management Division implements the following regulations: Export and Import of Hazardous Waste and Hazardous Recyclable Material Regulations (EIHWHRM)*

The intended use codes below are based upon the 2013 ITDS proposal by the United States to the World Customs Organization and is intended to assist importers & brokers in determining whether EIHWHRM regulations apply.

This is **not** intended to be an exhaustive list of all goods to which the regulations apply. Please refer to the full text of the regulations for more details.

Applicable Intended Use Codes

IUC	Short Description	Detailed Description
050.001	Hazardous waste disposal by Incineration without pretreatment	Incineration of hazardous waste at land-based facility (D10) without applying physical-chemical or biological pretreatment
050.002	Physical-Chemical Treatment of hazardous waste followed by Incineration	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by incineration of hazardous waste at land-based facility (D10)
050.003	Biological Treatment of hazardous waste followed by Incineration	Reduce or eliminate hazardousness using biological treatment (D8) followed by incineration of hazardous waste at land-based facility (D10)
050.004	Hazardous waste disposal in Landfill without pretreatment	Disposal of hazardous waste in an engineered landfill (D5) without applying physical-chemical or biological pretreatment
050.005	Physical-Chemical Treatment of hazardous waste followed by Disposal in Landfill	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Disposal of hazardous waste in an engineered landfill (D5)
050.006	Biological Treatment of hazardous waste followed by Disposal in Landfill	Reduce or eliminate hazardousness using biological treatment (D8) followed by Disposal of hazardous waste in an engineered landfill (D5)
050.007	Hazardous waste disposal Underground Injection without pretreatment	Deep underground injection of hazardous waste (D3) without applying physical-chemical or biological pretreatment
050.008	Physical-Chemical Treatment of hazardous waste followed by disposal using Underground Injection	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Deep underground injection of hazardous waste (D3)
050.009	Biological Treatment of hazardous waste followed by disposal using Underground Injection	Reduce or eliminate hazardousness using biological treatment (D8) followed by Deep underground injection of hazardous waste (D3)
050.010	Hazardous waste disposal by Surface Impoundment without pretreatment	Surface impoundment of hazardous waste (D4) without applying physical-chemical or biological pretreatment
050.011	Physical-Chemical Treatment of hazardous waste followed by disposal using Surface Impoundment	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Surface impoundment of hazardous waste (D4)

050.012	Biological Treatment of hazardous waste followed by disposal using Surface Impoundment	Reduce or eliminate hazardousness using biological treatment (D8) followed by Surface impoundment of hazardous waste (D4)
050.013	Hazardous waste disposal by Permanent Storage without pretreatment	Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine) without applying physical-chemical or biological pretreatment
050.014	Physical-Chemical Treatment of hazardous waste followed by disposal using Permanent Storage	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine)
050.015	Biological Treatment of hazardous waste followed by disposal using Permanent Storage	Reduce or eliminate hazardousness using biological treatment (D8) followed by Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine)
050.018	Miscellaneous Hazardous Waste Disposal	Other types of hazardous waste treatment or disposal
160.001	Recycling or recovery of waste as an Energy source	Use of waste as a fuel (other than in direct incineration) or other means to generate energy (R1)
160.002	Recycling, Recovery or Reclamation of Solvents	Solvent reclamation/regeneration (R2)
160.003	Recycling, Recovery or Reclamation of Organic Substances	Recycling/reclamation of organic substances which are not used as solvents (R3)
160.004	Recycling, Recovery or Reclamation of Metals	Recycling/reclamation of metals and metal compounds (R4)
160.005	Recycling, Recovery or Reclamation of Non-Metallic Inorganic Compounds	Recycling/reclamation of non-metallic inorganic materials (R5)
160.006	Regeneration of Acids or Bases	Regeneration of acids or bases (R6)
160.007	Recovery of Pollution Control Components	Recovery of components used for pollution control (R7)
160.008	Recovery of Components from Catalysts	Recovery of components from catalysts (R8)
160.009	Recovery of Used Oil	Re-refining or other reuses of previously used oil (R9)
160.010	Use of Waste as Land Treatment	Use as a land treatment resulting in benefit to agriculture or ecological improvement (R10)
160.012	Miscellaneous Hazardous Waste Recycling	Other types of Hazardous Waste Recycling

B3.2 Ozone-Depleting Substances and Halocarbon Alternatives

B3.2.1 Program Description

The objective of the Ozone Layer Protection (OLP) program is the protection of the ozone layer by providing regulatory, policy and information management of ozone-depleting substances and halocarbon alternatives (ODSHA).

Since 1989, Canada has adopted regulations to control the export, import, manufacture, sale, offer for sale and certain uses of ODS. This is currently done through the Ozone-depleting Substances and Halocarbon Alternatives Regulations (ODSHAR), which came to force December 29, 2016 and replaced the *Ozone-depleting Substances Regulations, 1998* (ODSR 1998). The ODSHAR introduced a permitting system for a group substances, hydrofluorocarbons (HFCs), which means that the same rules and procedures that apply to the import of ODS apply now to the import of HFCs, i.e., a permit is now required to import HFCs.

The ODSHAR requires that a company possess a permit or a consumption allowance to manufacture, import or export ODS and HFCs. Controls are also established on certain products that contain or are designed to contain ODS.

Applications for permits are sent by companies to Environment and Climate Change Canada (ECCC), by mail, fax, email or hand through available forms for these requests. When an application is received, it is reviewed and validated to ensure all information required under the ODSHAR has been provided and its accuracy is assessed. Once approved, the permit is issued to the applicant.

Consumption allowances are issued to companies for the import of virgin ODS. The allowances are granted by ECCC on an annual basis. The names of all companies that receive a consumption allowance for a calendar year are posted on the CEPA Registry and made available for public viewing. Companies can apply for a transfer of consumption allowance.

Therefore, there are three possible types of LPCO that could apply to import of substances regulated by the ODSHAR:

- OLPEC Permit
- OLPEC Allowance
- OLPEC Allowance Transfer

OLPEC Permits are specific to:

- the company, and
- the substance (commodity).

OLPEC Allowances are specific to:

- the company, and
- hydrochlorofluorocarbons (HCFCs).

Permits issued under ODSHAR are valid until December 31 of the year for which they are issued. Consumption allowances are issued prior to the start of a calendar year and are valid through December 31 of the year for which they are issued. Consumption allowance holders are automatically informed of their allowances for the following year.

A copy of the permit and the consumption allowance, or the letter of acknowledgement must be provided by the exporter or importer, as the case may be, to the customs office where the substance or the product is required to be reported under section 12 or 95 of the Customs Act.

B3.3 Wildlife Enforcement

B3.3.1 Program Description

The purpose of the [Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act](#) (WAPPRIITA) and the associated [Wild Animal and Plant Trade Regulations](#) (WAPTR) is to protect certain species of animals and plants, including those listed in the [Convention on International Trade in Endangered Species of Wild Fauna and Flora](#) (CITES), and to regulate international and interprovincial trade in those species.

WAPPRIITA applies to:

- a) Foreign species whose capture, possession, and export are prohibited or regulated by laws in their country of origin;
- b) Wild animal and plant species on the CITES control list ([Schedule I of the WAPTR](#));
- c) Alien species that can endanger Canadian species by way of introduction into Canadian ecosystems ([Schedule II of the WAPTR](#)); and

CITES is an international agreement between governments; its purpose is to ensure that the international trade of specimens of wild animals and plants does not threaten their survival. As a Party to CITES, Canada has an international obligation to regulate the trade in CITES-listed wild animals and plants and their parts and derivatives. WAPPRIITA is the legislative vehicle through which Canada meets its obligations under the Convention. Environment and Climate Change Canada (ECCC) is responsible for establishing and enforcing the policies governing the importation of CITES goods into Canada. The Canada Border Services Agency (CBSA) assists ECCC by enforcing these policies as they apply at the border. CITES species regulated by Canada are listed in [Schedule I of WAPTR](#). A searchable [CITES species list](#) can be found on ECCC's Web site.

In addition, certain species that may threaten Canadian ecosystems are prohibited from entering Canada without an import permit issued by ECCC. These species are listed in [Schedule II of WAPTR](#).

For additional information on CITES and WAPPRIITA import requirements please refer to CBSA Memorandum [D19-7-1: Interpretation of the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act \(WAPPRIITA\) and the Convention on International Trade in Endangered Species of Wild Fauna and Flora \(CITES\)](#).

Import Requirements

Type of Good	Documentation Requirements
CITES Appendix I	Canadian CITES import permit issued by Canadian Management Authority AND, a CITES export permit issued by the exporting country OR a CITES re-export certificate issued by the exporting country.
CITES Appendix II	CITES export permit issued by the exporting country OR a CITES re-export certificate issued by the exporting country.
CITES Appendix III	CITES export permit issued by the exporting country if the specimen is from a listing nation OR CITES export permit OR a CITES certificate of origin OR a CITES re-export certificate if the specimen is from another nation.
WAPTR Schedule II species	Import Permit issued by Canadian Management Authority.

Note: Original CITES and WAPPRIITA permits must also be physically presented to the border services officer for validation when reporting to the CBSA.

B3.4 Vehicle and Engine Emissions Program

B3.4.1 Program Description

Legislative references

Canada has introduced several regulations under the authority of Part 7 (Controlling Pollution and Managing Wastes), Division 5 (Vehicle, Engine and Equipment Emissions) of the *Canadian Environmental Protection Act, 1999* (CEPA) to help reduce air pollutant and greenhouse gas emissions from vehicles and engines.

- *On-Road Vehicle and Engine Emissions Regulations*
- *Passenger Automobile and Light Truck Greenhouse Gas Emission Regulations*
- *Heavy-duty Vehicle and Engine Greenhouse Gas Emission Regulations*
- *Off-road Compression Ignition Engine Emission Regulations*
- *Off-Road Small Spark-Ignition Engine Emission Regulations*
- *Marine Spark-Ignition Engine, Vessel and Off-Road Recreational Vehicle Emission Regulations*

Please refer to the following Tariff site for any changes to HS Codes

<http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

Summarized list of the Applicable HS Codes for the Vehicle and Engine Emissions Program.

B4. Fisheries and Oceans Canada

B4.1 Aquatic Biotechnology Program

B4.1.1 Program Description

DFO's Aquatic Biotechnology Program has been in place since the late 1980s, with the majority of our developments occurring within the last decade. DFO plays a role in the regulation of living aquatic animal products of biotechnology* such as genetically engineered fish. With the development of new living aquatic animal products of biotechnology by companies around the world and in Canada, is the need to assess their environmental and indirect human health safety. This is achieved through the implementation of a regulatory program under the Canadian Environmental Protection Act, 1999 (CEPA 1999). DFO assists in the administration of the Aquatic Biotechnology Program Regulations (Organisms) under CEPA 1999 for living aquatic animal products of biotechnology.

* "biotechnology" means the application of science and engineering in the direct or indirect use of living organisms or parts or products of living organisms in their natural or modified forms.

B4.2 Aquatic Invasive Species Program

B4.2.1 Program Description

Aquatic Invasive Species (AIS) are a major threat to Canada's environment and economy. Aquatic invasive species establish themselves in our coastal or inland waters and can spread rapidly, radically altering habitat resulting in reductions or outright extinction of indigenous fish and local fisheries. The most effective approach to dealing with species that are (or could become) established in Canada involves managing the pathways through which invasive species enter and spread through Canadian waters. For aquatic species, these pathways are shipping, recreational and commercial boating, the use of live bait, the aquarium/water garden trade, live food fish, unauthorized introductions and transfers, and canals and water diversions. Fisheries and Oceans Canada (DFO) leads many initiatives that aim to minimize the threats that AIS pose to the Canadian ecosystem.

<http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

Applicable HS Codes

List of HSCODES applicable to goods/substances that may be regulated as Invasive Species

Regulatory Criteria: Validation and Regulatory Rules are applied.

Code	Description ⁴
0301.93.00.00	Live fish. - Other live fish: - Carp (<i>Cyprinus carpio</i> , <i>Carassius carassius</i> , <i>Ctenopharyngodon idellus</i> , <i>Hypophthalmichthys</i> spp., <i>Cirrhinus</i> spp., <i>Mylopharyngodon piceus</i>)
0302.73.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading 03.04. - Carp (<i>Cyprinus carpio</i> , <i>Carassius carassius</i> , <i>Ctenopharyngodon idellus</i> , <i>Hypophthalmichthys</i> spp., <i>Cirrhinus</i> spp., <i>Mylopharyngodon piceus</i>)
0302.91.00.90	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading 03.04. - Livers, roes and milt, other than herring, fresh or chilled
0303.25.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading 03.04. - Carp (<i>Cyprinus carpio</i> , <i>Carassius carassius</i> , <i>Ctenopharyngodon idellus</i> , <i>Hypophthalmichthys</i> spp., <i>Cirrhinus</i> spp., <i>Mylopharyngodon piceus</i>)
0303.91.00.90	Fish, frozen, excluding fish fillets and other fish meat of heading 03.04. - Livers, roes and milt, other than herring, frozen
0307.91.00.00	Molluscs, Live, fresh or chilled: Other-
0307.99	Molluscs, Other than live, fresh or chilled: Other

This list above captures, as narrowly as possible, the species that are currently prohibited from import into Canada under the Aquatic Invasive Species Regulations: i.e., Grass carp (*Ctenopharyngodon idellus*), Silver carp (*Hypophthalmichthys molitrix*), Black carp (*Mylopharyngodon piceus*), Bighead carp (*Hypophthalmichthys nobilis*) (collectively "Asian carps"), zebra mussels (*Dreissena polymorpha*) and quagga mussels (*Dreissena bugensis*).

Note: Zebra and Quagga mussels are molluscs

B4.3 Trade Tracking Program (Fisheries Resource Management)

B4.3.1 Program Description

Fisheries and Oceans Canada manages fisheries in accordance with the roles and responsibilities outlined in the *Fisheries Act*, using credible, science-based, affordable and effective practices. Key priorities for fisheries management in Canada include:

- environmental sustainability;
- economic viability; and
- The inclusion of stakeholders in decision-making processes.

Legislative references

The updates to the Coastal Fisheries Protection Regulations, following amendments to the Coastal Fisheries Protection Act approved through Bill S-3, will provide the regulatory authority for the government of Canada to specify the form of documentation required to accompany imports of certain fish and marine plants into Canada. This is needed as Canada does not currently have the authority to prohibit the import of fish, other than for food safety and health reasons. The revisions to the Coastal Fisheries Protection Regulations will identify the select species which are covered regionally or globally by some form of trade tracking documentation requirement, and will allow these species to be seized at the border if the correct documentation is not presented with the shipment. The updates to the Coastal Fisheries Protection Regulations are pending and expected to be completed in 2017, at which point Canada will have the legal authority to prohibit the import.

Please refer to the following [Tariff site](http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2017/01-99/ch03-2017-eng.pdf) for any changes to HS Codes

Applicable HS Codes	Code Values	Description
List of HSCODES applicable to goods/substances that may be regulated as Trade Tracking (Fisheries Resource Management)	Bluefin and Bigeye Tunas	Description
	0301.94.00.00	Live fish: Atlantic and Pacific bluefin tunas (<i>Thunnus thynnus</i> , <i>Thunnus orientalis</i>)
	0301.95.00.00	Live fish: Southern bluefin tunas (<i>Thunnus maccoyii</i>)
	0302.31.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Albacore or longfinned tunas (<i>Thunnus alalunga</i>)
	0302.32.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Yellowfin tunas (<i>Thunnus albacares</i>)
	0302.33.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Skipjack or stripe-bellied bonito
	0302.34.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Bigeye tunas (<i>Thunnus obesus</i>)
	0302.35.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Atlantic and Pacific bluefin tunas (<i>Thunnus thynnus</i> , <i>Thunnus orientalis</i>)
	0302.36.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Southern bluefin tunas (<i>Thunnus maccoyii</i>)
	0302.39.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Tunas (of the genus <i>Thunnus</i>), skipjack or stripe-bellied bonito (<i>Euthynnus (Katsuwonus) pelamis</i>), excluding livers and roes: Other than those specified above
	0302.89.00.90	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Other, not elsewhere specified

0303.41.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Albacore or longfinned tunas (<i>Thunnus alalunga</i>)
0303.42.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Yellowfin tunas (<i>Thunnus albacares</i>)
0303.43.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Skipjack or stripe-bellied bonito
0303.44.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Bigeye tunas (<i>Thunnus obesus</i>)
0303.45.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Atlantic and Pacific bluefin tunas (<i>Thunnus thynnus</i> , <i>Thunnus orientalis</i>)
0303.46.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Southern bluefin tunas (<i>Thunnus maccoyii</i>)
0303.49.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Tunas (of the genus <i>Thunnus</i>), skipjack or stripe-bellied bonito (<i>Euthynnus (Katsuwonus) pelamis</i>), excluding livers and roes: Other than those specified above
0303.89.00.90	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Other, not elsewhere specified
0304.49.00.90	Fresh or chilled fillets of other fish: Other than those elsewhere specified
0304.59.00.00	Fresh or chilled meat of other fish: Other than those elsewhere specified
0304.87.00.00	Frozen fillets of other fish: Tunas (of the genus <i>Thunnus</i>), skipjack or stripe-bellied bonito (<i>Euthynnus (Katsuwonus) pelamis</i>)
Swordfish	Description
0302.47.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Swordfish (<i>Xiphias gladius</i>)
0303.57.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Swordfish (<i>Xiphias gladius</i>)
0304.45.00.00	Fish fillets, fresh or chilled: Fresh or chilled fillets of other fish – Swordfish (<i>Xiphias gladius</i>)
0304.54.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other fresh or chilled – Swordfish (<i>Xiphias gladius</i>)
0304.84.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other frozen fillets – Swordfish (<i>Xiphias gladius</i>)
0304.91.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other, frozen – Swordfish (<i>Xiphias gladius</i>)
Toothfish	Description (Antarctic Toothfish, Chilean Seabass or Patagonian Toothfish)
0302.83.00.00	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Other fish, excluding livers and roes – Toothfish (<i>Dissostichus</i> spp)
0302.89.00.90	Fish, fresh or chilled, excluding fish fillets and other fish meat of heading No. 03.04: Other, not elsewhere specified

0303.83.00.00	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Other fish, excluding livers and roes – Toothfish (<i>Dissostichus</i> spp)
0303.89.00.90	Fish, frozen, excluding fish fillets and other fish meat of heading No. 03.04: Other, not elsewhere specified
0304.46.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other fresh or chilled fillets – Toothfish (<i>Dissostichus</i> spp)
0304.55.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other fresh or chilled – Toothfish (<i>Dissostichus</i> spp.)
0304.85.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other frozen fillets – Toothfish (<i>Dissostichus</i> spp.)
0304.92.00.00	Fish fillets and other fish meats (whether or not minced), fresh, chilled or frozen: Other, frozen – Toothfish (<i>Dissostichus</i> spp.)

B5. Global Affairs Canada (GAC) (formerly Department of Foreign Affairs, Trade and Development - DFATD)

B5.1 All Programs

B5.1.1 Program Description

This appendix contains importer requirements for the following GAC programs:

GAC is responsible for administering the *Export and Import Permits Act* (EIPA). The EIPA delegates to the Minister of Foreign Affairs discretionary powers to control the flow of goods contained in specified lists, including the *Import Control List*, provided for under the Act. The importation of any good included in the *Import Control List* is prohibited except under the authority of and in accordance with an import permit issued under the EIPA.

Agricultural Products

A number of agricultural products (dairy products, poultry, eggs, margarine, beef and veal, as well as wheat, barley, and their products) are included on the *Import Control List* and are subject to tariff rate quotas (TRQs) negotiated under the North American Free Trade Agreement (NAFTA) and the World Trade Organization (WTO). Under a TRQ, in any given year, a predetermined quantity of imports of a controlled good can enter the country at a zero or low rate of duty, while imports over this quantity are subject to higher rates of duty. Depending on the commodity, either a shipment-specific import permit issued by GAC according to the applicable TRQ's rules and policies or a General Import Permit made by Ministerial order is required for shipments of controlled agricultural products to enter Canada at the low rates of duty. Imports at the higher rates of duty are not subject to quantitative restrictions but must be made under the authority of the applicable General Import Permit.

Clothing & Textiles

In accordance with the Tariff Preference Levels (TPLs) negotiated under the NAFTA, the Canada-Chile Free Trade Agreement, the Canada-Costa Rica Free Trade Agreement and the Canada-Honduras Free Trade Agreement, some clothing and textile goods coming from Mexico, the United States, Chile, Costa Rica and Honduras are included on the *Import Control List*. Under the TPLs, in any given year, a predetermined quantity of imports of clothing and textile goods that meet predefined criteria but do not otherwise satisfy a free trade agreement's Rules of Origin nevertheless qualify for that agreement's duty rates, while imports over this quantity are subject to the higher, Most-Favored-Nation rates of duty. Only the clothing and textile goods that meet the TPLs' criteria and are seeking TPL benefits are subject to import controls and included on the *Import Control List*. Shipments of those goods to be imported into Canada require an import permit issued by GAC to qualify for the preferential tariffs.

Steel

Carbon and specialty steel products are included on the *Import Control List* for the purpose of collecting information concerning the importation of such goods, through the Steel Import Surveillance Program. This program was first implemented in 1986 and has been constantly renewed for two- or three-year periods since then. It is not meant to limit the quantity of carbon and specialty steel products that may be imported into Canada, but rather to provide stakeholders with accurate and timely statistics on imports of steel into Canada. Accordingly, imports into Canada of carbon and specialty steel products must be made under the authority of the applicable General Import Permit (GIP): *GIP No. 80 – Carbon Steel* or *GIP No. 81 – Specialty Steel Products*.

The above programs are all referenced in the following regulations:

Legislative references

- *Export and Import Permits Act and its regulations: Import Control List, Import Permits Regulations, Import Allocation Regulations, various General Import Permits*

Program	Applicable HS Codes
Agricultural Products	Refer to items 94 to 191 of the Import Control List (http://laws-lois.justice.gc.ca/eng/regulations/C.R.C., c. 604/index.html)
Clothing & Textiles	Refer to items 85 to 86.97 of the Import Control List (http://laws-lois.justice.gc.ca/eng/regulations/C.R.C., c. 604/index.html).
Steel	The ranges of 7206-7302, 7304-7306, 7308, 7312-13, and 7317

(please refer to the following tariff site for any HS updates: <http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>)

Technical Note

All IID submissions for shipment-specific permits that include one or more commodities regulated by GAC must be submitted **no more than 30 days** in advance of arrival in Canada. Any submissions (whether they reference an existing permit or are applications for a new permit) will be rejected if they are submitted more than 30 days in advance of arrival.

All IID submissions that invoke only General Import Permits may be received more than 30 days in advance of arrival.

GAC intends to roll out SWI in a phased manner by commodity sector (e.g. Beef and Veal, followed by other commodities)

B5.2 GAC IID Scenarios

The IID has been developed to ensure that shared importation requirements, as well as importation requirements unique to PGAs can be processed within the one joint CBSA/PGA declaration.

Global Affairs Canada (GAC) has several permit-related import scenarios that are unique to that department. The following information has been compiled as supplemental reference information to the GAC Appendix B requirements to describe three of these scenarios and how they are reported within the IID:

1. *General Import Permit (GIP) applications* ;
2. *Shipment specific permits*; and
3. *Alternative quota quantity requests*

B5.2.1 Scenario 1: General Import Permit (GIP)

The IID declaration can be used to provide GAC with import information, including General Import Permit Number for goods such as agricultural and steel products. The IID declaration, in addition to the CBSA release information, includes the following information to meet the GAC GIP requirements for the specified commodity.

As per instructions in the ECCRD, Appendix B is the definitive source specific to the PGA requirements and does not preclude the requirement to provide CBSA release information as detailed in the GOVCBR Message Implementation Guide (MIG) Appendix A. This supplemental scenario information should be read in conjunction with Appendix A and GAC Appendix B information in determining all data requirements for any particular GAC regulated transactions.

Mapping Note:

Segment groups **SG9** and **SG121** contain a variety of information, including document images, on licences, permits, certificates and other (LPCO) documents used for PGA purposes to regulate this import. **SG121** through **SG124** contain information applicable to a *specific* commodity line. **SG9** through **SG12** contain information that is applicable to *all* lines in the entire declaration. If required information is not provided by the importer in an **SG121** segment group, it must then be present in the **SG9** segment group, or the declaration is non-compliant.

Group	Segment	Element	Data
SG13	RCS	7295	The CBSA coded value of 57 to indicate that a <i>Permit application is included</i>
SG9/SG121	DOC	1001	The international code value of 916 for a <i>Related Document</i>
		1131	The CBSA coded values of 2004 for <i>Agriculture General Import Permit</i> or 2006 for a <i>Steel General Import Permit</i> , as applicable.
		1004	The specific type of GIP being provided (e.g., "GIP100" for eggs)
SG10/SG122	NAD	3035	The international code value of DDD for <i>Applicant</i>
		3039	The Business Number of the applicant
SG10/SG122	NAD	3035	The international code value of DFK for <i>LPCO Authorized Party</i>
		3039	The Business Number of the GAC importer (quota-holder)
SG117	TCC	1131	The international code value of HS for <i>Harmonised system</i>
		7357	The 10-digit commodity (HS) code

B5.2.2 Scenario 2: Shipment specific permits

The IID can be used to accommodate shipment specific permits that were previously obtained directly from GAC. If using a shipment-specific permit that was already applied for, the elements highlighted in **green** can be omitted. The rows highlighted in **blue** are only necessary for permits that require a foreign export Licence .

As per instructions in the ECCRD, Appendix B is the definitive source specific to the PGA requirements and does not preclude the requirement to provide CBSA release information as detailed in the GOVCBR Message Implementation Guide (MIG) Appendix A. This supplemental scenario information should be read in conjunction with Appendix A and GAC Appendix B information in determining all data requirements for any particular GAC regulated transactions.

Mapping Note:

Segment groups **SG9** and **SG121** contain a variety of information, including document images, on licences, permits, certificates and other (LPCO) documents used for PGA purposes to regulate this import. **SG121** through **SG124** contain information applicable to a *specific* commodity line. **SG9** through **SG12** contain information that is applicable to *all* lines in the entire declaration. If required information is not provided by the importer in an **SG121** segment group, it must then be present in the **SG9** segment group, or the declaration is non-compliant.

Group	Segment	Element	Data
SG13	RCS	7295	The CBSA coded value of 57 to indicate that a <i>Permit application is included</i>
SG9/SG121	DOC	1001	The international code value of 916 for a <i>Related Document</i>
		1131	The CBSA coded values of 2001 for a <i>Clothing & Textiles Shipment-Specific Permit</i> , 2003 <i>Agriculture Shipment-Specific Permit</i> , as applicable.
		1004	The GAC shipment-specific permit number (EICS-II Reference Number). Omit if the permit is being applied for with this declaration and the number is unknown.
	DOC	1001	The international code value of 916 for a <i>Related Document</i>
		1131	The CBSA coded value of 2007 for a <i>Foreign Export Licence</i>
		1004	The foreign export licence number specifying the specific issuance of the document
		1366	The unique reference number (URN) for the image of the foreign export licence that was scanned in and submitted to the CBSA.
	RFF	1153	The international code value of ABB for <i>End use authorization number</i>
		1154	A description of the intended end-use provided to obtain the foreign export Licence
SG10/SG121	NAD	3035	The international code value of DDD for <i>Applicant</i>
		3039	The Business Number of the applicant
SG11/SG123	CTA	3412	The shipment-specific contact for the GAC importer
SG10/SG122	NAD	3035	The international code value of DFK for <i>LPCO Authorized Party</i>
		3039	The Business Number of the GAC importer (quota-holder)
SG11/SG123	CTA	3412	The shipment-specific contact for the GAC importer
SG117	TCC	1131	The international code value of HS for <i>Harmonised system</i>
		7357	The full 14-digit EIPA commodity (HS) code

B5.2.3 Scenario 3: Documented Alternative (Quota) Quantity

Certain goods imported into Canada that are subject to GAC Tariff Rate Quota (TRQ) quantity allocations may be components of manufactured commercial products. For example, chicken is an agricultural product subject to quantity based TRQs, however upon importing a “breaded” chicken product, as the TRQ is strictly on the chicken and not the “breeding”. To meet this requirement, the IID includes fields to declare an alternative quota quantity by including the following data.

As per instructions in the ECCRD, Appendix B is the definitive source specific to the PGA requirements and does not preclude the requirement to provide CBSA release information as detailed in the GOVCBR Message Implementation Guide (MIG) Appendix A. This supplemental scenario information should be read in conjunction with Appendix A and GAC Appendix B information in determining all data requirements for any particular GAC regulated transactions.

Mapping Note:

Segment groups **SG9** and **SG121** contain a variety of information, including document images, on licences, permits, certificates and other (LPCO) documents used for PGA purposes to regulate this import. **SG121** through **SG124** contain information applicable to a *specific* commodity line. **SG9** through **SG12** contain information that is applicable to *all* lines in the entire declaration. If required information is not provided by the importer in an **SG121** segment group, it must then be present in the **SG9** segment group, or the declaration is non-compliant.

Group	Segment	Element	Data
SG9/SG121	DOC	1001	The international code value of 916 for a <i>Related Document</i>
		1131	The CBSA coded value of 2005 for a <i>GAC Documented Alternative Quantity</i>
		1004	The CFIA product registration number (Label Approval Documentation Reference) to which the alternative quantity adjustment applies
		1366	The optional unique reference number (URN) for the image of any supporting documentation needed to support the quota adjustment.
	QTY	6063	The international code value of 1 for <i>Discrete quantity</i>
		6060	The alternative number of quota units to be used
		6411	An international code for the unit of measure for this quota quantity. Note that this must align with expected units of measure for the HS code provided on this line in the SG117.TCC segment
SG10/SG122	NAD	3035	The international code value of DDD for <i>Applicant</i>
		3039	The Business Number of the applicant
SG11/SG123	CTA	3412	The shipment-specific contact for the applicant
SG10/SG122	NAD	3035	The international code value of DFK for <i>LPCO Authorized Party</i>
		3039	The Business Number of the GAC importer (quota-holder)
SG11/SG123	CTA	3412	The shipment-specific contact for the GAC importer
SG117	TCC	1131	The international code value of HS for <i>Harmonised system</i>
		7357	The full 14-digit EIPA commodity (HS) code

B6. Health Canada

B6.1 Active Pharmaceutical Ingredients

B6.1.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder.

Legislative references

- the Food and Drugs Act

As many HS codes can contain ingredients regulated under this Act, importers must use the legislation as a guide and self-identify by specifying a Canadian Product Category of **Active Pharmaceutical Ingredient**

B6.4 Consumer Products

B6.4.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder.

These activities apply to the importation into Canada of cosmetics, as defined by the *Food and Drug Act and Regulations*, consumer chemicals regulated by the *Hazardous Products Act*, and consumer products, as defined by the *Canada Consumer Product Safety Act*.

Legislative references

- the *Canada Consumer Product Safety Act*, and relevant regulations thereunder (<http://laws-lois.justice.gc.ca/eng/acts/C-1.68/index.html>)
- the *Hazardous Products Act*, and relevant regulations thereunder (<http://laws-lois.justice.gc.ca/eng/acts/H-3/>)
- the Cosmetic Regulations, made under the Food and Drugs Act (http://laws-lois.justice.gc.ca/eng/regulations/C.R.C.,_c._869/)

HS Codes

Applicable list of HS CODES for goods/substances that may be regulated as consumer products

It is possible for products from a wide spectrum of HS classifications to be considered regulated by Consumer Products.

The full HS list can be found at: <http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

B6.5 Donor Semen

B6.5.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder. These activities apply to all drugs and devices as defined by the *Food and Drug Act*, including donor semen for assisted conception.

Legislative references

- The Food and Drugs Act
- Distribution of Semen for Assisted Conception Regulations

Please refer to the following Tariff site for any changes to HS Codes : <http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

B6.7 Office Of Controlled Substances

B6.7.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the Canada Consumer Product Safety Act, the Controlled Drugs and Substances Act, the Food and Drugs Act, the Hazardous Products Act, the Radiation Emitting Devices Act, the Pest Control Products Act, as well as regulations made thereunder.

These activities apply to all controlled drugs and substances regulated under the Controlled Drugs and Substances Act.

Legislative references

- The Controlled Drugs and Substances Act and relevant regulations thereunder.

Please refer to the following Tariff site for any changes to HS Codes

<http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

SG128 QTY (Q) 6411 (E) 6060	Component / Ingredient Details (Quantity)	Ingredient Quantity	C	The quantity of each ingredient identified in SG128 must be provided, including the unit of measure (in field 6411)	UN Rec. 20, Annex I + II + III, Common code	
SG128 PCD (Q) 5245 (E) 5482	Component / Ingredient Details (Quality)	Ingredient Quality	C	If applicable, the quality (percentage of concentration) of each ingredient identified in SG128 must be provided. If this segment is not provided, the assumption will be that the concentration is 100% for this ingredient.	6	

B6.8 Medical Devices

B6.8.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder. These activities apply to all drugs and devices as defined by the *Food and Drug Act*, including medical devices.

Legislative references

- The Food and Drugs Act
- Medical Devices Regulations

Please refer to the following Tariff site for any changes to HS Codes

<http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

B6.9 Natural Health Products

B6.9.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder. These activities apply to all drugs and devices as defined by the *Food and Drug Act*, including natural health products.

Legislative references

- The Food and Drugs Act
- Natural Health Products Regulations

Please refer to the following Tariff site for any changes to HS Codes

<http://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/>

B6.10 Pesticides (Pest Management Regulatory Agency)

B6.10.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the *Canada Consumer Product Safety Act*, the *Controlled Drugs and Substances Act*, the *Food and Drugs Act*, the *Hazardous Products Act*, the *Radiation Emitting Devices Act*, the *Pest Control Products Act*, as well as regulations made thereunder.

The Health Canada Pest Management Regulatory Agency (PMRA) is responsible for pesticide regulation in Canada. This branch of Health Canada consolidates the resources and responsibilities for pest management regulation

Legislative references

- *Pest Control Products Act*
- *Pest Control Products Regulations*

B6.11 Radiation Emitting Devices

B6.11.1 Program Description

The CBSA assists Health Canada in administering the following legislation at the border: the Canada Consumer Product Safety Act, the Controlled Drugs and Substances Act, the Food and Drugs Act, the Hazardous Products Act, the Radiation Emitting Devices Act, the Pest Control Products Act, as well as regulations made thereunder. These activities apply to all devices as defined by the Radiation Emitting Devices Act.

The Radiation Emitting Devices (RED) Act governs the sale, lease and import of certain radiation emitting devices used for medical and industrial purposes or by consumers. The Act sets safety performance standards for the sale, lease, import, labeling, packaging, and advertising of radiation emitting devices to ensure that workers and the public are not placed at risk.

B7. Natural Resources Canada

B7.1 Office of Energy Efficiency

B7.1.1 Program Description

Natural Resources Canada (NRCan) is responsible for administering Canada's [Energy Efficiency Regulations](#) (the Regulations). These regulations are made under the [Energy Efficiency Act](#). All regulated energy-using products must meet the requirements of the Regulations, including federal energy efficiency standards, labelling and reporting, in order to be imported into Canada or shipped from one province to another. The Regulations continue to apply to these products if they are incorporated into a larger unit even when that unit is an unregulated product.

Under the Regulations, a dealer who imports a regulated energy-using product into Canada must provide for product release, the following information regarding the product, as well as the purpose of its importation:

- name of product
- model number
- brand name
- address of the dealer who is importing the product
- the purpose for which the product is being imported
 - for sale or lease in Canada without modification
 - for sale or lease in Canada after being modified to comply with the prescribed energy efficiency standard or
 - for use as a component in a product being exported from Canada

Legislative and Regulatory references: Section 5 of the *Energy Efficiency Act* and Section 13 of the *Energy Efficiency Regulations*.

SG118 LOC (Q) 3227 (E) 3223	Commodity State of Origin	State of Origin	O	If the country of origin provided in this SG118.LOC is either Canada or the United States, the ISO 3166 province or state of origin can also be provided in this field.	27	

B7.2 Explosives

B7.2.1 Program Description

The Explosives Regulatory Division (ERD) of the Explosives Safety and Security Branch (ESSB) of Natural Resources Canada (NRCan) is responsible for administering Canada's [Explosives Act and Regulations](#).

ERD operates with one main goal in mind: the safety and security of both the public and of all workers involved in the explosives industry in Canada. Through the Explosives Safety and Security Branch, the department provides services and support to the explosives industry including manufacturers, importers, exporters, distributors and users of explosives. This is carried out through a system of licences and permits supported by a compliance inspection program.

B7.3 Rough Diamonds

B7.3.1 Program Description

The international Kimberley Process Certification Scheme requires that trade in rough diamonds be exclusively amongst Kimberley Process participants. A certificate issued by the exporting Kimberley Process authority is required to accompany imports of rough diamonds into Canada. This certificate ensures that the rough diamonds for import have been handled in a manner that meets the minimum requirements of the Kimberley Process Certification Scheme.

The implementation of the Kimberley Process Certification Scheme in Canada is achieved through its legislation. The [Export and Import of Rough Diamonds Act](#) contains Canada's requirements for exporting and importing rough diamonds. The program is administered based on the [Export and Import of Rough Diamonds Regulations](#). The implementation of export and import controls is conducted by the Canada Border Services Agency and is outlined in its "[Memorandum D19-6-4](#)".

B7.3.2 Data Element Rules/Conditions

IID Segment & Tags	Data Element Name	PGA Element Name	Data Element Status (for NRCan Declarations)	Data Element Rules & Conditions	Qualifier	Codes
SG9 DOC 1131	Document Type (Certificate)	Certificate Type	C	The coded identifier for a Kimberley Process Certificate must be provided here if the KPC is being provided at the declaration level. No more than one KPC can be provided at the Declaration Level. Certificates provided here must be applicable to all commodities on this declaration. If not applicable to all commodities, please provide the certificates at the commodity line level. Note: no commodity can have a KPC at both the Declaration and Commodity Line Level		3004
SG9 DOC 1004	Document Reference Number	Certificate Number	C	The certificate number of the KP certificate being used for this declaration must be provided in this field.		
SG9 DTM (Q) 2005 (E) 2380	Document Issue Date	Issue Date	C	The issue date of the KP certificate being used for this declaration must be provided in this field using a CCYYMMDD format.	137	
SG9 DTM (Q) 2005 (E) 2380	Document Expiry Date	Expiry Date	C	The expiry date of the KP certificate being used for this declaration must be provided in this field using a CCYYMMDD format.	36	

SG9 DOC 1366	Document Location	Scanned KPC	C	This field must contain a fully-qualified URN using which an image of the KP certificate being used for this declaration can be accessed by qualified CBSA and NRCan employees.		
SG12 LOC (Q) 3227 (E) 3225	Document Issuing Location	Issuing Authority	C	A country code, as per section G24, must be provided in this field for the country of issuance of the KP certificate being used for this declaration.	91	
SG12 LOC (Q) 3227 (E) 3225	Document Country of Origin	Country of Origin (Mining)	C	A country code, as per section G24, must be provided in this field for the country in which this commodity was mined, according to the KP certificate being used for this declaration. If, on the KP certificate, the country of origin is not specified or is specified as Mixed, this field is omitted. In this situation, field 1131 will be populated with the code MIX - Mixed country of origin.	27	
SG12 LOC (Q) 3227 (E) 1131	Document Country of Origin (Mixed)	Country of Origin (Mixed)	C	If one or more countries of origin on the KP certificate are unknown or specified as Mixed, this field must be provided with the code MIX - Mixed country of origin.	27	MIX
SG115 PAC (E) 7224	GAGI Packaging Quantity	Number of Packages/Parcels	C	If there are multiple commodities (HS codes) on the KPC associated with the commodities contained by this GAGI-line, the number of packages specified on the KPC must be provided in this field. If there is only a single HS code on the KPC associated with the commodities contained by this GAGI-line, the normal import requirements apply as per Appendix A.		
SG117 MEA (Q) 6313 (E) 6314	Commodity Size (Weight)	Carat Weight	M	The carat weight of this commodity must be provided. The measurement unit code of (CTM) must also be provided in the element (MOA.C174.6411) to indicate that carats are being provided.	ABS	
SG117 MOA (Q) 5025 (E) 5004	Commodity Value	Value in US\$	M	The total commercial value of this commodity must be provided in US dollars. The currency code for US dollars (USD) must also be provided in (MOA.C516.6345)	66	
SG118 LOC (Q) 3227 (E) 3225	Commodity Country of Origin	Country of Origin	C	A country code as per section G24 must be provided for the country of origin if different than the one listed in the associated SG104.LOC segment.	27	
SG121 DOC 1131	Document Type (Certificate)	Certificate Type	C	The coded identifier for a Kimberley Process Certificate must be provided here if the KPC is being provided at the commodity line level. No more than one KPC can be provided at the Commodity Line Level. Further, no commodity can have a KPC at both the Declaration and Commodity Line Level.		3004
SG121 DOC 1004	Document Reference Number	Certificate Number	C	The certificate number of the KP certificate being used for this commodity line must be provided in this field.		

SG121 DTM (Q) 2005 (E) 2380	Document Issue Date	Issue Date	C	The issue date of the KP certificate being used for this commodity line must be provided in this field using a CCYYMMDD format.	137	
SG121 DTM (Q) 2005 (E) 2380	Document Expiry Date	Expiry Date	C	The expiry date of the KP certificate being used for this commodity line must be provided in this field using a CCYYMMDD format.	36	
SG121 DOC 1366	Document Location	Scanned KPC	C	This field must contain a fully-qualified URN using which an image of the KP certificate being used for this commodity line can be accessed by qualified CBSA and NRCan employees.		
SG124 LOC (Q) 3227 (E) 3225	Document Issuing Location	Issuing Authority	C	A country code, as per section G24, must be provided in this field for the country of issuance of the KP certificate being used for this commodity line.	91	
SG124 LOC (Q) 3227 (E) 3225	Document Country of Origin	Country of Origin (Mining)	C	A country code, as per section G24, must be provided in this field for the country in which this commodity was mined, according to the KP certificate being used for this declaration. If, on the KP certificate, the country of origin is not specified or is specified as Mixed , this field is omitted. In this situation, field 1131 will be populated with the code MIX - Mixed country of origin.	27	
SG124 LOC (Q) 3227 (E) 1131	Document Country of Origin (Mixed)	Country of Origin (Mixed)	C	If one or more countries of origin on this LPCO are unknown (e.g., a KP certificate specifies Country of Origin as "mixed" or does not specify in case of United States), this field must be provided with the code MIX - Mixed country of origin .	27	MIX
SG127 PAC 7224	Packaging Quantity	Number of Packages/ Parcels	C	The count of packages/parcels for the commodity line is required if there is only one commodity (HS Code) on the KPC and number of packages/parcels specified on KPC is not provided in the associated SG115.PAC segment.		

B8. Public Health Agency of Canada

B8.1 Human And Terrestrial Animal Pathogens & Biological Toxins

B8.1.1 Program Description

The Public Health Agency of Canada (PHAC) is responsible for biosafety regulation (anticipating and averting public health threats), biosafety information (reducing risks and promoting professional practices), and biosafety expertise (providing technical advice and tools to biosafety stakeholders).

Legislative references

- *Human Pathogens and Toxins Act* and Regulations,
- Human Pathogens Importation Regulations (under the Department of Health Act) - *repealed in 2015*,
- Health of Animals Regulations (select sections, under the Health of Animals Act)
- Quarantine Act

Please refer to the following Tariff site for any changes to HS Codes

B9.2 Vehicles Program

B9.2.1 Program Description

The Canada Border Services Agency (CBSA) assists Transport Canada with the administration of the *Motor Vehicle Safety Act* and the *Motor Vehicle Safety Regulations* by administering and enforcing the conditions under which new and used vehicles may be imported at CBSA points of entry.

The *Motor Vehicle Safety Act* regulates the importation of vehicles to reduce the risk of death, injury, and damage to property and the environment. The CBSA also assists the Canadian Food Inspection Agency (CFIA) with the administration of the *Plant Protection Act* by enforcing the conditions under which used vehicles may be imported at CBSA points of importation. The *Plant Protection Act* regulates the importation of injurious plant pests that can be transported in soil and related matter.

Please refer to the following Tariff site for any changes to HS Codes

This vehicle is being imported into Canada to be dismantled for parts and will not be rebuilt or licensed in Canada. I further agree that the declared status for this vehicle to be dismantled for parts cannot be changed. I authorize the required service payment.</i>	13	TC04				

Appendix C: IID EDIFACT Outbound MIG

This EDIFACT Message Implementation Guide (MIG) describes the structure and composition of an outbound message from the CBSA to a client. This message may be a response to an IID submitted by a client, or an unsolicited message (in the case of a status change to a release as a result of a third party).

Many outbound messages are shared amongst many projects at the CBSA, of which the SWI is just one. The messaging systems responsible for these outbound messages are currently being enhanced to accommodate upcoming projects in addition to the SWI.

C1. Message Structure

The table below depicts the segment groups, segments and looping relationships between them in the EDIFACT IID Response Message.

Counter	No	Tag	St	MaxOcc	Level	Content
0000	1	UNA	C	1	0	Service string advice
0000	2	UNB	M	1	0	Interchange header
0000	3	UNG	C	1	0	Functional group header
0010	4	UNH	M	1	0	Message header
0020	5	BGM	M	1	0	Beginning of message
0030	6	DTM	M	1	1	Message Date
0060	7	RFF	C	1	1	Secondary Business Number

4404	Status description		5	C	an..35	M	an..35	The code provided in this field indicates what type of status (the "sub-status") is being conveyed in this message to further qualify the type described in BGM.1001: S001 Positive functional acknowledgement The IID was syntactically correct and a positive functional acknowledgement message is being provided in response. No error codes will be present. S002 Negative functional acknowledgement One or more syntax errors were found in the submitted IID and a negative functional acknowledgement message is being provided in response. This can also occur if the IID did not provide a mandatory data field required by the CBSA (as per Appendix A of the SWI ECCRD). Detailed information for each error can be found in SG17. S003 Preferential quota rate accepted The tariff quota rate referred to by the IID has been accepted by the PGA responsible for supply management of the commodity. This can be a result of many business processes including, but not limited to: a shipment-permit application being successful, a permit reference (whether GIP or not) being deemed appropriate or an alternative quota quantity application being successful. S004 Preferential quota rate rejected The tariff quota rate referred to by the IID has been rejected by the PGA responsible for supply management of the commodity. Please refer to SG17 for more detailed error codes surrounding this rejection. If uncorrected before then, the default tariff rate(s) will apply when this IID is acquitted.

0550 **SG13** C 1 1 **Request for Information / Manual Errors**

This segment group will NOT appear on positive response messages.

For functional errors, location details (segment, occurrence, element etc.) of the error will be present within the ERP segment, and a code of ZZZ will be provided within the ERC.9321 element.

For application errors, location details will not be present within the ERP segment. The determination of which field generated a given error message in the IID can be determined by mapping the error code provided in the ERC segment with the error messages & fields provided in the latest SWI Error Code List.

This response will only support the first 99 distinct error codes, each of which can be present on up to 999 lines each.

The department/agency (either a PGA or the CBSA) responsible for generating the error codes contained in this segment loop is found in the SG13.RCS segment

0560 13 **RCS** M 1 1 **Requesting PGA**

---------	----	-----	----	--------	-------	------

0690 **SG17** C 99 1 **Error Details**

This segment group will NOT appear on positive response messages.

For functional errors, location details (segment, occurrence, element etc.) of the error will be present within the ERP segment, and a code of ZZZ will be provided within the ERC.9321 element.

For application errors, location details will not be present within the ERP segment. The determination of which field generated a given error message in the IID can be determined by mapping the error code provided in the ERC segment with the error messages & fields provided in the latest SWI Error Code List. This response will only support the first 99 distinct error codes, each of which can be present on up to 999 lines each.

The department/agency (either a PGA or the CBSA) responsible for generating the error codes contained in this segment loop is found in the SG13.RCS segment.

0700 15 **ERC** M 1 1 **Application error information**

UN/EDIFACT Definitions EDIFACT GOVCBR Standard Syntax					CBSA Implementation Business Application Attributes			
Tag	Name	Pos	Place	St	Forma	St	Format	Usage / Remark
ERC								
C901	Application error detail	010		M		M		
9321	Application error code	1		M	an..8	M	an..8	This field contains a standardized CBSA error code. For an accurate list, please refer to the latest SWI Error Code List published by the CBSA. Some examples from Appendix H are provided below: <ul style="list-style-type: none"> 0A0 Importer Information Contact (IC): Name of the person knowledgeable regarding the specific shipment details must be provided. 0A1 Importer Information Contact (IC): Telephone number or email address is missing. 0A2 The given combination of Canadian Document Type, Intended Use code and/or Canadian Product Category is not acceptable for the PGA program. functional (syntax) errors, this field will be populated with "ZZZ" instead of an application error code.

Remark:

Example:

ERC+0A0'

No = Consecutive segment number
 MaxOcc = Maximum occurrence of the segment/group
 Counter = Counter of segment/group within the standard
 Pos = Element position
 Sep = Syntax separator

Counter	No	Tag	St	MaxOcc	Level	Name
0710		SG18	C	999	2	ERP
This segment group contains an occurrence for each line and field to which the error code in SG17.ERC.9321 applies to.						
0720	16	ERP	M	1	2	Error point details

UN/EDIFACT Definitions EDIFACT GOVCBR Standard Syntax						CBSA Implementation Business Application Attributes		
Tag	Name	Pos	Place	St	Forma	St	Format	Usage / Remark
ERP								
C701	Error point details	010		C		M		
1049	Message section code	1		C	an..3	C	an..3	Future Use
								This numeric field indicates what segment group of the original IID this error refers to. E.g., if the error occurred at the commodity-level LPCO group (SG121), this field will have the value "121". If a value of "0" is provided, this indicates that the error occurred in one of the header segments.
1052	Message item identifier	2		C	an..35	C	an..35	A short text string describing the details of the error encountered.
1054	Message sub-item identifier	3		C	n..6	C	n..6	The exact element number or tag which generated this error(e.g., 7081 for Item Characteristic located in SG117.IMD.7081)
C853	Error segment point details	020		C		M		
9166	Segment tag identifier	4		C	an..3	C	an..3	The tag or name of the segment (e.g., IMD, GIN etc.) in which the element that triggered this error was found.
1050	Sequence position identifier	5		C	an..10	C	an..10	The line number of the IID message where this error occurred. This number is unrelated to any values provided in SEQ or LIN segments in the IID.
1159	Sequence identifier source code	6		C	an..3	C	an..3	The sub position, or "place", of the element in which the error occurred. This is used to distinguish elements when segments contain multiple segments with the same tag (e.g., SG117.GIN contains 3 7402 segments at places 2, 3, and 4, so if an error occurred on the third one, this field would contain a "4").

C3.7 Tariff Rate Quota Response (Preferential quota rate rejected)

In this business scenario, the IID had requested a quota adjustment (for a shipment-specific permit), and this response message is an example of a rejection of that request. The code indicating that the Preferential quota rate is rejected (S004), is populated in the STS field and the reason from GAC is populated in the free-text (FTX) field.

Appendix D: XML Inbound Message

Please note that XML transactions are currently not supported for the IID.

Appendix E: XML Outbound Message

Please note that XML transactions are currently not supported for the IID.

Appendix F: SWI Participating Government Agencies/Programs Listing

The following listing contains the participants in the Single Window Initiative. This listing does not necessarily account for the internal organization within departments (particularly lines of business). If there is a question concerning the participation of a line of business within SWI, please contact the appropriate department.

Canadian Food Inspection Agency (7)

- Animal Health (including Terrestrial Animal Health, Aquatic Animal Health, and Veterinary Biologics)
- Feed
- Fertilizer Safety
- Food (including Agrifood, Fish and Seafood, Meat, Imported and Manufactured Food)
- Plant Health
- Plants with Novel Traits
- Seed

Canadian Nuclear Safety Commission (1)

- Import Program (Nuclear Substances and Equipment)

Environment and Climate Change Canada (4)

- Waste Reduction & Management Division Program
- Wildlife Enforcement
- Ozone Depleting Substances and Halocarbon Alternatives Program
- Vehicle and Engine Emissions Program

Fisheries and Oceans Canada (3)

- Aquatic Biotechnology Program
- Aquatic Invasive Species
- Trade Tracking

Global Affairs Canada (3)

- Agriculture
- Steel
- Textiles and Clothing

Health Canada (12)

- Active Pharmaceuticals
- Blood and Blood Components
- Cells, Tissues and Organs
- Consumer Product Safety
- Donor Semen
- Medical Devices
- Natural Health Products
- Human Drugs (including Radiopharmaceuticals)
- Clinical Radiation and Protection
- Drug Strategy and Controlled Substances
- Health Products and Food Branch
- Pest Management Regulatory Agency

Natural Resources Canada (3)

- Energy Efficiency
- Explosives
- Kimberley Process

Public Health Agency of Canada (1)

- Importation of Human and Terrestrial Animal Pathogens and Biological Toxins

Transport Canada (2)

- Vehicles
- Tires

Appendix G: Code Tables

G6. Unit of Measure Codes

For measurement units, the CBSA only supports (for the purposes of IID submission) the international codes listed in the UN/CEFACT Recommendation 20, Annex I. Please use the two and three-character “Common Code” column found in the “Annex I” worksheet in the following spreadsheet:

http://www.unece.org/fileadmin/DAM/cefact/recommendations/rec20/Rec20_Rev6e_2009.xls

Note: Some PGAs may have requirements around allowable measurement units for a commodity; see PGA appendices for details. Measurement codes referenced in the HS Tariff are still supported.

G7. Unit of Count Codes

For counting units, the CBSA (for the purposes of IID submission) only supports the international codes listed in the UN/CEFACT Recommendation 20, Annex II & III. Please use the two and three-character “Common Code” column found in the “Annex II & III” worksheet in the following spreadsheet:

http://www.unece.org/fileadmin/DAM/cefact/recommendations/rec20/Rec20_Rev6e_2009.xls

Note: Some PGAs may have requirements around allowable measurement units for a commodity; see PGA appendices for details. Measurement codes referenced in the HS Tariff are still supported.

G8. Packaging Qualifier Codes

For packaging types, the CBSA only supports (for the purposes of IID submission) the international codes listed in the UN/CEFACT Recommendation 21, Annex V. Please use the 2-character alphabetic code listed on p276 of the following publication:

http://www.unece.org/fileadmin/DAM/cefact/recommendations/rec21/rec21rev1_ecetrd195e.pdf

G9. DTM Format Qualifiers

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric “Tag” for references purposes; in this example, the segment tag is DTM.

The segment group “DTM” is present in segment groups 9, 50, 51, 117, 121, and 142.

Code Tag	Code Description
10	CCYYMMDDTHHMM
101	YYMMDD
102	CCYYMMDD
203	CCYYMMDDHHMM
204	CCYYMMDDHHMMSS
205	CCYYMMDDHHMMZHHMM
303	CCYYMMDDHHMMZZZ
602	CCYY
609	YYMM
610	CCYYMM
804	Day
805	Hour
806	Minute
807	Second

The qualifier (data element 2379) indicates *the Date or time or period format code* being provided. Within each segment are a series of “code tags” (format qualifiers). Each qualifier corresponds to a different date, time or period format in which the data element is expected to be provided.

For example:

For the “DTM” segment with data element “2379”, if format qualifier of “10” is selected, the only format that will be accepted is:

CCYYMMDDTHHMM

e.g. 20131230T1352 for the date December 30, 2013 T1:52 pm

G10. Total Value for Duty - MOA Segment

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric "Tag" for reference purposes; in this example the segment tag is MOA. The segment group "MOA" is present in segment groups 51 and 117.

Code Tag	Code Description
39	Invoice Total Amount
66	Goods Item Total
134	Total Declared
146	Unit Price

The qualifier (data element 5025) indicates *the type of monetary amount* being provided.

Within each segment are a series of "Code Tags" (format qualifiers). Each qualifier corresponds to a different code description.

For example:

For "MOA" segment with data element "5025", if format qualifier of "39" is selected only "Invoice Total Amount will be accepted".

G11. LOC Format Qualifiers – CBSA Office of Clearance/PGA Processing Location

Code Tag	Code Description
23	Port of Release
27	Country of Origin
30	Country of Source
35	Exportation Country
44	Place of authentication of document
91	Place of Document Issue
274	Place of Physical examination
277	Place of Loading on final means of transport
280	Compliant facility, registered

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric “Tag” for reference purposes. In this example, the segment is LOC.

The segment group “LOC” is present in segment groups 3, 12, 50, 101, 118 and 124.

The qualifier (data element 3227) indicates the Location being provided. Within each segments are series of “code tags” (format qualifiers). Each qualifier corresponds to a different Location in which the data element is expected to be provided.

For Example:

If “Code Tag” 27, is selected only “country of Origin” will be accepted.

G12. NAD (Name and Address) Format Qualifier

Code Tag	Description	Code Tag	Description
AE	Declarant's agent/representative	BY	Buyer
CA	Carrier	CB	Customs Broker
DDD	Applicant	DFE	Feedlot
DFI	Crop Grower	DFK	LPCO Authorized Party
DFS	Veterinary Certificate Issuer	DFT	Assembler
DP	Delivery Party	EX	Exporter
FW	Freight Forwarder	GN	Processor
HQ	Account Owner	IM	Importer
MF	Manufacturer	UC	Ultimate Consignee
VN	Vendor	WH	Warehouse Keeper
WW	Registering Party		

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric "Tag" for reference purposes; in this example, the segment tag is NAD.

The segment group "NAD" is present in segment groups 7, 10, 48, 102, 119, 122 143.

The qualifier (data element 3035) indicates the Party Function Code Qualifier being provided. Within each segment are a series of "code tags" (format qualifiers). Each qualifier corresponds to a different parties Name and Address.

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric "Tag" for reference purposes; in this example, the segment tag is NAD.

The segment group "NAD" is present in segment groups 7, 10, 48, 102, 119, 122 143.

The qualifier (data element 3035) indicates the Party Function Code Qualifier being provided. Within each segment are a series of "code tags" (format qualifiers). Each qualifier corresponds to a different parties Name and Address.

For Example:

If Code Tag "AE" is selected, only "Declarant's agent/representative" will be accepted.

G13. Government Agency Qualifier

Code Tag	Code Name	Code Description
1	CFIA	Canadian Food Inspection Agency
3	GAC	Global Affairs Canada
5	CBSA	Canada Border Services Agency
12	HC	Health Canada
13	TC	Transport Canada
20	DFO	Fisheries and Oceans Canada
21	NRCAN	Natural Resources Canada
22	ECCC	Environment and Climate Change Canada
23	PHAC	Public Health Agency of Canada
24	CNSC	Canadian Nuclear Safety Commission

Every EDIFACT segment (a group of associated data elements) is assigned a unique 3 alpha numeric Tag for reference purposes; in this example, the segment tag is GOR.

The segment group GOR is present in segment group 3. This segment group indicates the PGA(s) involved in the importation and if CBSA/PGA exception processing is applicable.

The qualifier (data element 9415) indicates the *Government Agency Identification Code*. Within each segment are a series of code tags (format qualifiers). Each qualifier corresponds to a different Government Agency.

For example:

Code tag1 identifies the CFIA.

G14. PGA Exception Process Qualifier

The segment group RCS Government Requirements is present in segment group 13.

The qualifier (data element 7295) indicates the type of *Exception Process/PGA Action*, or *exceptional or special processing applicable for this declaration*.

For example:

“Code Tag” “51” indicates **Extended Release Privileges**.

Code Tag	Code Description	Notes
51	Extended Release Privileges (ERP)	
52	Driver Waiting/ Rush Shipment (DW)	
56	Wood Packaging Indicator (WPI)	
57	Permit Application (PERM)	For use by GAC (Agricultural). Permit applications must indicate that a permit is requested by providing the coded value (3) for permit request. “57” = Permit (quota) application included.
4	Inspection Arrangements Complete (INSP)	
EC01	ECCC - On-Road Vehicles, Engines and Equipment	For use by Vehicle and Engine Emissions Program - On-Road Vehicles, Engines and Equipment
EC02	ECCC - Off-Road Compression (Diesel) Engines	For use by Vehicle and Engine Emissions Program - Off-Road Compression (Diesel) Engines
EC03	ECCC - Off-Road Small Spark-Ignition (Gasoline) Engines	For use by Vehicle and Engine Emissions Program - Off-Road Small Spark-Ignition (Gasoline) Engines
EC04	ECCC - Marine Spark-Ignition Engines, Vessels and Off-Road Recreational Vehicles	For use by Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles
HC01	HC - Cells, Tissues & Organs - Lymphohematopoietic Cells and Organs	For use by HC - Lymphohematopoietic cells and organs are exempt from having to provide Establishment Registration Numbers.
HC02	HC - Medical Devices - Medical Device Establishment Licence Exemption	For use by HC - Retailers, healthcare facilities and manufacturers that are eligible for an exemption to the establishment licensing requirement must indicate their status in this field. If this exemption is indicated, the Intended use Code, must equal Human Therapeutic Usage for all device classes.
HC03	HC - Pesticides - PMRA Scheduled Pest Management Products	For use by HC - Specific HC exceptional processing that may apply include: PMRA Scheduled Pest Management Products.
HC04	HC - Pesticides - PMRA Exempt Pest Management Products	For use by HC - Specific HC exceptional processing that may apply include: PMRA Exempt Pest Management Products.
TC01	TC - Tires Program - Tires Program	For use by TC - For commodities regulated under the Tire Program a code

		indicating 'Tire Program' must be provided.
TC02	TC - FMVSS Standard - TC1 - Standard Process	For use by TC Vehicle Program - FMVSS - Standard must indicate TC1 - Standard Process.
TC03	TC - FMVSS Case-By-Case - TC1 - E08 - Case-By-Case FMVSS - RIV	For use by TC (RIV) - TC1 = E08 -Case-by-Case FMVSS - RIV
TC04	TC - CMVSS Appendix F - TC3 - E01 - Appendix F - Commercial Importation	For use by TC3 - Appendix F
TC05	TC - CMVSS Appendix G - TC3 - E02 - Appendix G - Commercial Importation	For use by TC3 - Appendix G
TC06	TC - Returning Vehicles - TC3 - E03 - CMVSS Vehicle Returning by Original Owner	For use by TC3 - CMVSS Vehicle Returning by Original Owner.
TC07	TC - Age Exemption - TC3 - E04 - Age Exemption	For use by TC3 - Vehicle Age Exemption (Greater than 15 years)
TC08	TC - Unregulated Vehicles - TC3 - E05 - Non-Regulated & Others	For use by TC3 - This exemption code is to be used for all unregulated vehicles.
TC09	TC - CMVSS Appendix Case-By-Case - TC3 - E06 - Case-By-Case CMVSS - RIV	For use by TC3 - This exemption code is to be used on a case-by-case basis for CMVSS - Commercial Vehicle Imports.
TC10	TC - Vehicles for Parts - TC3 - E07 - Vehicle for Parts	For use by TC3 - This exemption coded is to be used for Parts.
PH01	PHAC - Human and Terrestrial Animal Pathogens & Biological Toxins - Exempt Pathogen/Toxin	For use by PHAC - Human Terrestrial Animal Pathogens

G15. LPCO Document Type Qualifier

The segment tag in this example is DOC - "Document Identification Details."

This segment group is present in Segment Groups 9 and 121. This segment group contains a variety of information on LPCO (licences, permits, certificates and other) documents used for PGA purposes to regulate this import.

The qualifier (data element 1131) indicates "Code List Identification Code" or *Canadian Document Types*. It should be noted that Codes 1 - 1000 are reserved for use by CFIA - and CFIA must be contacted.

For example:

Code Tag "2001" is for use only with GAC, Clothing and Textiles and indicates "Shipment - Specific Permit."

Code Tag	Description	Notes
1-1000	CFIA Documents - As per AIRS	Do not validate AIRS - refer to AIRS - contact CFIA
2001	GAC - Clothing and Textiles - Clothing and Textiles Shipment Specific Permit	GAC - Agriculture Products and Clothing and Textiles
2003	GAC - Agriculture Products - Agriculture Products - Shipment-Specific Permit	GAC - Agriculture Products and Clothing and Textiles
2004	GAC - Agriculture Products - Agriculture Products General Import Permit (GIP)	GAC - Agriculture Products and Clothing and Textiles
2005	GAC - Generic - Documented Alternative Quantity	GAC - Agriculture Products and Clothing and Textiles
2006	GAC - Steel - General Import Permit	GAC - Steel - General Import Permit
2007	Foreign Export Licence	GAC - Agriculture Products and Clothing and Textiles
3001	NRCAN - Explosives - Annual Explosives Permit (Type A)	NRCAN - Explosives
3002	NRCAN - Explosives - Single Use Explosives Permit (Type G)	NRCAN - Explosives
3003	NRCAN - Explosives - Tour, Event or International Competition Explosives Permit	NRCAN - Explosives
3004	NRCAN - Rough Diamonds - Kimberley Process Certificate	NRCAN - Rough Diamonds
4001	TC - Generic - Other Document	TC - Vehicles Program: Age Exemption (Greater than 15 years) Unregulated Vehicles ,
4002	TC - Vehicles - Case-by-Case Authorization	TC- Vehicles Program: CMVSS Case-by-Case FMVSS Case-by Case
4003	TC - Generic - Manufacturer Letter of Compliance	TC - Vehicles Program: FMVSS Standard Age Exemption (Greater than 15 years) FMVSS Case-by Case CMVSS Case-by-Case CMVSS Returning Vehicles

4004	TC - Generic - Vehicle Title	TC - Vehicles Program: CMVSS Case-by-Case FMVSS Case-by Case FMVSS Standard Age Exemption (Greater than 15 years) CMVSS Returning Vehicles Unregulated Vehicles Vehicles for Parts
4005	TC - Vehicles - Manufacturer Certificate of Origin	TC - Vehicles Program - Age Exemption (Greater than 15 years)
4006	TC - Generic - Racing Sanctioning Body Letter	TC - Vehicles Program: Age Exemption (Greater than 15 years) Unregulated Vehicles
5001	HC - Active Pharmaceutical Ingredients - Establishment Licence (EL)	HC - Active Pharmaceutical Ingredients
5002	HC - Blood and Blood Components - Establishment Licence (EL)	HC - Blood and Blood Components
5003	HC - Blood and Blood Components - Proof of Prescription	HC - Blood and Blood Components - Proof of Prescription
5004	HC - Cells, Tissues and Organs - Importer Establishment Registration	HC - Cells, Tissues and Organs
5005	HC - Cells, Tissues and Organs - Exporter Establishment Registration	HC - Cells, Tissues and Organs
5006	HC - Consumer Products - Cosmetics Product Number	HC - Consumer Products
5007	HC - Consumer Products - Safety Standard Certification	HC - Consumer Products
5008	HC - Donor Semen - Donor Semen Letter of Authorization (LOA)	HC - Donor Semen
5009	HC - Donor Semen - Semen Processor Declaration	HC - Donor Semen
5010	HC - Human Drugs - Establishment Licence (EL)	HC - Human Drugs
5011	HC - Human Drugs - Drug Identification (DI)	HC - Human Drugs
5012	HC - Human Drugs - Letter of Authorization (LOA)	HC - Human Drugs
5013	HC - Human Drugs - Clinical Trial No Objection Letter (CT NOL)	HC - Human Drugs
5014	HC - Office of Controlled Substances - Precursor Authorization Certificate	HC - Office of Controlled Substances
5015	HC - Office of Controlled Substances - Test Kit Registration	HC - Office of Controlled Substances
5016	HC - Office of Controlled Substances - Class B Precursor Registration	HC - Office of Controlled Substances
5017	HC - Office of Controlled Substances - Marihuana for Medical Purposes Regulations Producer Licence	HC - Office of Controlled Substances
5018	HC - Office of Controlled Substances - Import Permit	HC - Office of Controlled Substances

5019	HC - Medical Devices - Medical Devices Licence	HC - Medical Device
5020	HC - Medical Devices - Establishment Licence (EL)	HC - Medical Device
5021	HC - Medical Devices - Device Letter of Authorization (LOA)/ Request	HC - Medical Device
5022	HC - Natural Health Products - Site Licence	HC - Natural Health Products
5023	HC - Natural Health Products - Natural Product Authorization	HC - Natural Health Products
5024	HC - Natural Health Products - Homeopathic Medicine Drug Identification	HC - Natural Health Products
5025	HC - Natural Health Products - NHP Notice of Authorization (NOA)	HC - Natural Health Products
5026	HC - Pesticides - PMRA Registration	HC - Pesticides
5027	HC - Pesticides - Product Label	HC - Pesticides
5028	HC - Pesticides - PMRA Research Authorization Certificate	HC - Pesticides
5029	HC - Pesticides - PMRA Research Notification Certificate	HC - Pesticides
5030	HC - Pesticides - GROU Import Certificate	HC - Pesticides
5031	HC - Radiation Emitting Device - Product Label	HC - Radiation Emitting Device
5032	HC - Veterinary Drugs - Establishment Licence (EL)	HC - Veterinary Drugs
5033	HC - Veterinary Drugs - Veterinary Notification	HC - Veterinary Drugs
5034	HC - Veterinary Drugs - Experimental Studies Certificate	HC - Veterinary Drugs
5035	HC - Veterinary Drugs - Emergency Drug Release Authorization	HC - Veterinary Drugs
5036	HC - Veterinary Drugs - Veterinary No Objection Letter (NOL)	HC - Veterinary Drugs
5037	HC - Consumer Products - Product Label	HC - Consumer Products
5038	HC - Consumer Products - Other	HC - Consumer Products
5039	HC - Veterinary Drugs - Drug Identification (DI)	HC - Veterinary Drug
5040	HC - Office of Controlled Substances - Class A Precursor Licence	HC - Office of Controlled Substances
5041	HC - Office of Controlled Substances - Industrial Hemp Licence	HC - Office of Controlled Substances
5042	HC - Office of Controlled Substances - Certificate of Analysis	HC - Office of Controlled Substances
5043	HC - Office of Controlled Substances - Research Licence	HC - Office of Controlled Substances
5044	HC - Office of Controlled Substances - Controlled Drugs and Substances Act Licence	HC - Office of Controlled Substances
5045	HC - Natural Health Products - Letter of Authorization (LOA)	HC - Natural Health Products
5503	PHAC - Pathogen and Toxin Licence	PHAC - Human and Terrestrial Animal Pathogens
6000	DFO Aquatic Biotechnology - New Substances Notification	DFO - Aquatic Biotechnology
6001	DFO - Invasive Species - Federal Release/Transfer Licence	Licence to Release or Transfer Fish (DFO) - pursuant to Section 56 of the <i>Fishery (General) Regulations</i>
6002	DFO - Invasive Species - Alberta Fisheries Licence	Permit/Licence issued under subsection 12(1) of the <i>Fisheries (Alberta) Act</i>
6003	DFO - Trade Tracking - Atlantic Bluefin Tuna Catch Document	DFO - Trade Tracking

	(ICCAT)	
6004	DFO - Trade Tracking - Patagonian Toothfish (Dissostichus) Catch Document (CCAMLR)	DFO - Trade Tracking - Patagonian Toothfish (Dissostichus)
6005	DFO - Trade Tracking - Pacific Bluefin Tuna Catch Document (WCPFC or IATTC)	DFO - Trade Tracking
6006	DFO - Trade Tracking - Swordfish Statistical Document (ICCAT)	DFO - Trade Tracking
6007	DFO - Trade Tracking - Swordfish Re-export Certificate (ICCAT)	DFO - Trade Tracking
6008	DFO - Trade Tracking - Bigeye Tuna Statistical Document (ICCAT or IATTC)	DFO - Trade Tracking
6009	DFO - Trade Tracking - Bigeye Tuna Re-export Certificate (ICCAT)	DFO - Trade Tracking
6010	DFO - Invasive Species - British Columbia Freshwater Fish Licence	Permit/Licence issued under Section 3 of the Freshwater Fish Regulation of British Columbia
6011	DFO - Invasive Species - Manitoba Fish Licence	Permit/Licence issued under subsection 3(1) of the Fish Licensing Regulation of Manitoba
6012	DFO - Invasive Species - Manitoba Fisheries Licence	Permit/Licence issued under Section 16 of the Manitoba Fisheries Regulations
6013	DFO - Invasive Species - Newfoundland/ Labrador Wildlife Licence	Permit/Licence issued under Section 86 of the Wildlife Regulation of Newfoundland and Labrador
6014	DFO - Invasive Species - Ontario Fish Licence	Permit/Licence issued under Sections 34.1 and 34.2 of the Fish Licensing of Ontario
6015	DFO - Invasive Species - Ontario Fisheries Licence	Permit/Licence issued under subsection 6(2) of the Ontario Fisheries Regulations
6016	DFO - Invasive Species - Quebec Fisheries Licence	Permit/Licence issued under Section 19 of the Quebec Fisheries Regulations
6017	DFO - Invasive Species - Saskatchewan Fish Licence	Permit/Licence issues under subsection 88.3 of the Fisheries Regulations (Saskatchewan)
6018	DFO - Invasive Species - Saskatchewan Fisheries Licence	Permit/Licence issued under subsection 9(3) of the Saskatchewan Fisheries Regulations
6019	DFO- Invasive Species - Canada National Parks Fishing Licence	Permit/Licence issued under all applicable provisions in regulations made under the Canada National Parks Act,
6020	DFO - Trade Tracking - Atlantic Bluefin Tuna Re-Export Document (ICCAT)	DFO - Trade Tracking
6021	DFO - Pacific Bluefin Tuna Re-Export Document (WCPFC or IATTC)	DFO - Trade Tracking
6022	DFO - eBCD Bluefin Catch Document (ICCAT)	DFO - Trade Tracking
6023	DFO - eBCD Bluefin Re-Export Document (ICCAT)	DFO - Trade Tracking
7000	CNSC - Import Program - Licence	CNSC - Import Program (Nuclear Substances and Equipment)

7001	CNSC - Import Program - Device Certificate	CNSC - Import Program (Nuclear Substances and Equipment)
8000	ECCC - Waste Reduction and Management - Movement Type	ECCC - Waste Reduction and Management Division
8001	ECCC - Waste Reduction and Management - Hazardous Waste/Hazardous Recyclable (HW/HRM) Permit	ECCC - Waste Reduction and Management Division
8010	ECCC - OLPEC Permit	ECCC Ozone Depleting Substances
8011	ECCC - OLPEC Allowance	ECCC Ozone Depleting Substances
8012	ECCC - OLPEC Allowance Transfer	ECCC Ozone Depleting Substances
8020	ECCC - CITES Appendix I	ECCC Wildlife Enforcement
8021	ECCC - CITES Appendix II	ECCC Wildlife Enforcement
8022	ECCC - CITES Appendix III	ECCC Wildlife Enforcement
8023	ECCC - WAPTR Schedule II Species	ECCC Wildlife Enforcement

G16. LPCO Quota UOM Qualifiers

All units from UN/CEFACT Recommendation 20 may be used. That is, any of the Common Codes may be used from the “Units of Count” and “Unit of Measure” worksheets in the following spreadsheet:

http://www.unece.org/fileadmin/DAM/cefact/recommendations/rec20/Rec20_Rev6e_2009.xls

G17. Item Characteristics Qualifier

The Segment Group “IMD” - Item Description is present in group 117. This segment group contains: the *commodity line level of detail* on the goods being imported, including characteristics necessary for compliance identification. This segment group must be repeated for each commodity line. The qualifier (data element 7081) *Item Characteristic Code* qualifies the type of characteristics. This qualifier is used to provide both coded and non-coded (free form) characteristics of the commodity being imported. Many PGAs have specific characteristics that must be reported for commodities regulated by them. Please refer to PGA appendices for details on each requirement, but the chart below can give an overview of which program uses which qualifier.

For Example:

“Code Tag 38” identifies “Grade”.

Code Tag	Code Description	Notes
8	Product	All PGAs as well as the CBSA
38	Grade	Future Use
44	Mileage/Odometer Reading	TC - Vehicles Program
57	Trade Name	HC - Consumer Products, Pesticides NRCAN - Explosives
121	Physical	Future Use
135	Engine	ECCC - Vehicle and Engine Emissions Program
140	Chassis	TC - Vehicles Program
180	Specification (Chemical)	CNSC - Import Program
202	Vehicle Body Type	TC - Vehicles Program
203	Condition	TC - Vehicles Program
209	Gender	DFO - Aquatic Biotechnology, Invasive Species
211	Genetic Modification Indicator	DFO - Aquatic Biotechnology
212	Life Stage	DFO - Aquatic Biotechnology, Invasive Species, Trade Tracking
217	Recombinant Genes	DFO - Aquatic Biotechnology
221	Model Name	DFO - Aquatic Biotechnology, Invasive Species, Trade Tracking HC - Radiation Emitting Devices NRCAN - Office of Energy Efficiency TC - Vehicles Program
222	Variety	Future Use
223	Brand Name	HC - Active Pharmaceutical Ingredients , Consumer Products, Special Access, OCS, Medical Devices, Natural Health Products, Pesticides, Veterinary NRCAN - Office of Energy Efficiency TC - Tires Program, Vehicles Program
228	Year of Production	TC - Vehicles Program
250	Scientific Name	DFO - Aquatic Biotechnology, Invasive Species, Trade Tracking

G18. Coded Characteristic

The Segment Group “IMD” *Item Description* is present in group 117. This segment group *contains the commodity line level of detail* on the goods being imported including characteristics necessary for compliance identification. This segment group must be repeated for each commodity line. The qualifier (data element 7009) *Item Description Code* qualifies the type of characteristics of the commodity being imported.

For example:

“Code Tag” T1 identifies a Bus, it should be noted that if T1 = Bus is selected “Code Tag” 202 from the above table “Item Characteristics Qualifier” which signifies that the *Vehicle Body Type* must be described.

Code Tag	Code Description	Notes
ENG500	Engine Manufacturer	135 - To be used by ECCC - Vehicle and Engine Emissions Program
ENG501	Make of Engine	135 - To be used by ECCC - Vehicle and Engine Emissions Program
ENG502	Model of Engine	135 - To be used by ECCC - Vehicle and Engine Emissions Program
ENG503	Model Year of Engine	135 - To be used by ECCC - Vehicle and Engine Emissions Program
ENG504	Engine Power Rating	135 - To be used by ECCC - Vehicle and Engine Emissions Program
14000	TC - Generic - Chassis manufacturer of the vehicle	140 - if this code is used, the business name of the 1st stage (chassis) manufacturer of the vehicle must be provided
14001	TC - Generic - Make of Chassis	140 - if this code is used, the make of the chassis must be provided
14002	TC - Generic - Model of Chassis	140 - if this code is used, the model of the chassis must be provided
14003	TC - Generic - Year of Chassis	140 - if this code is used, the year of the chassis must be provided
Various	CNSC Chemical Specification See Table 1 in B2.1.3 (Following CNSC Appendix)	180 - Chemical Specification Qualifier 180 to be used with Chemical Specification codes listed in Table 1 of CNSC appendix (B2.1.3)
TC0801	TC - Generic - Passenger Car	202 - if this code is used, the vehicle Body type must be described
TC0702	TC - Generic - MPV-Limousine/Funeral Vehicle	202 - if this code is used, the vehicle Body type must be described

G19. Intended Use Code

The Segment Group “APP” - *Intended End Use* is present in group 117. This segment group contains Commodity line level of detail on the goods being imported including all characteristics necessary for compliance identification. This segment must be repeated for each commodity line. The qualifier (data element 9049), “Applicability type description code (*Intended End-Use Coded*)” – A code to identify how a product will be used within Canada, i.e. consumption, animal feed or processing.

For example:

If “Code Tag” H02 is selected, this code signifies that it is an import regulated by Health Canada Drug Program and is the code for Human Consumption Therapeutic.

Code Tag	Description	Notes	To be Used by
EC01	Commercial	Environment and Climate Change Canada	Wildlife Enforcement
EC02	Botanical garden	Environment and Climate Change Canada	Wildlife Enforcement

The Intended Use Codes below are WCO Codes based upon 2013 ITDS proposal by the United States to the World Customs Organization intended to assist importers and brokers in determining whether EIHWHRM Regulations apply. These codes are currently only used by Environment and Climate Change Canada but may be used for other Departments/Agencies in the future.

IUC Code Tag	Description	Detailed Description	To be used by
050.001	Hazardous waste disposal by Incineration without pretreatment	Incineration of hazardous waste at land-based facility (D10) without applying physical-chemical or biological pretreatment	Environment and Climate Change Canada – Waste Reduction Management
050.002	Physical-Chemical Treatment of hazardous waste followed by Incineration	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by incineration of hazardous waste at land-based facility (D10)	Environment and Climate Change Canada – Waste Reduction Management
050.003	Biological Treatment of hazardous waste followed by Incineration	Reduce or eliminate hazardousness using biological treatment (D8) followed by incineration of hazardous waste at land-based facility (D10)	Environment and Climate Change Canada – Waste Reduction Management
050.004	Hazardous waste disposal in Landfill without pretreatment	Disposal of hazardous waste in an engineered landfill (D5) without applying physical-chemical or biological pretreatment	Environment and Climate Change Canada – Waste Reduction Management
050.005	Physical-Chemical Treatment of hazardous waste followed by Disposal in Landfill	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Disposal of hazardous waste in an engineered landfill (D5)	Environment and Climate Change Canada – Waste Reduction Management
050.006	Biological Treatment of hazardous waste followed by Disposal in Landfill	Reduce or eliminate hazardousness using biological treatment (D8) followed by Disposal of hazardous waste in an engineered landfill (D5)	Environment and Climate Change Canada – Waste Reduction Management
050.007	Hazardous waste disposal Underground Injection without pretreatment	Deep underground injection of hazardous waste (D3) without applying physical-chemical or biological pretreatment	Environment and Climate Change Canada – Waste Reduction Management
050.008	Physical-Chemical Treatment of hazardous waste followed by disposal using Underground Injection	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Deep underground injection of hazardous waste (D3)	Environment and Climate Change Canada – Waste Reduction Management

050.009	Biological Treatment of hazardous waste followed by disposal using Underground Injection	Reduce or eliminate hazardousness using biological treatment (D8) followed by Deep underground injection of hazardous waste (D3)	Environment and Climate Change Canada – Waste Reduction Management
050.010	Hazardous waste disposal by Surface Impoundment without pretreatment	Surface impoundment of hazardous waste (D4) without applying physical-chemical or biological pretreatment	Environment and Climate Change Canada – Waste Reduction Management
050.011	Physical-Chemical Treatment of hazardous waste followed by disposal using Surface Impoundment	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Surface impoundment of hazardous waste (D4)	Environment and Climate Change Canada – Waste Reduction Management
050.012	Biological Treatment of hazardous waste followed by disposal using Surface Impoundment	Reduce or eliminate hazardousness using biological treatment (D8) followed by Surface impoundment of hazardous waste (D4)	Environment and Climate Change Canada – Waste Reduction Management
050.013	Hazardous waste disposal by Permanent Storage without pretreatment	Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine) without applying physical-chemical or biological pretreatment	Environment and Climate Change Canada – Waste Reduction Management
050.014	Physical-Chemical Treatment of hazardous waste followed by disposal using Permanent Storage	Reduce or eliminate hazardousness using physical or chemical treatment (D9) followed by Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine)	Environment and Climate Change Canada – Waste Reduction Management
050.015	Biological Treatment of hazardous waste followed by disposal using Permanent Storage	Reduce or eliminate hazardousness using biological treatment (D8) followed by Permanent storage of hazardous waste (D12) (e.g. placement of containers in a mine)	Environment and Climate Change Canada – Waste Reduction Management
050.018	Miscellaneous Hazardous Waste Disposal	Other types of hazardous waste treatment or disposal	Environment and Climate Change Canada – Waste Reduction Management
160.001	Recycling or recovery of waste as an Energy source	Use of waste as a fuel (other than in direct incineration) or other means to generate energy (R1)	Environment and Climate Change Canada – Waste Reduction Management
160.002	Recycling, Recovery or Reclamation of Solvents	Solvent reclamation/regeneration (R2)	Environment and Climate Change Canada – Waste Reduction Management
160.003	Recycling, Recovery or Reclamation of Organic Substances	Recycling/reclamation of organic substances which are not used as solvents (R3)	Environment and Climate Change Canada – Waste Reduction Management
160.004	Recycling, Recovery or Reclamation of Metals	Recycling/reclamation of metals and metal compounds (R4)	Environment and Climate Change Canada – Waste Reduction Management
160.005	Recycling, Recovery or Reclamation of Non-Metallic Inorganic Compounds	Recycling/reclamation of non-metallic inorganic materials (R5)	Environment and Climate Change Canada – Waste Reduction Management

			Management
160.006	Regeneration of Acids or Bases	Regeneration of acids or bases (R6)	Environment and Climate Change Canada – Waste Reduction Management
160.007	Recovery of Pollution Control Components	Recovery of components used for pollution control (R7)	Environment and Climate Change Canada – Waste Reduction Management
160.008	Recovery of Components from Catalysts	Recovery of components from catalysts (R8)	Environment and Climate Change Canada – Waste Reduction Management
160.009	Recovery of Used Oil	Re-refining or other reuses of previously used oil (R9)	Environment and Climate Change Canada – Waste Reduction Management
160.010	Use of Waste as Land Treatment	Use as a land treatment resulting in benefit to agriculture or ecological improvement (R10)	Environment and Climate Change Canada – Waste Reduction Management
160.012	Miscellaneous Hazardous Waste Recycling	Other types of Hazardous Waste Recycling	Environment and Climate Change Canada – Waste Reduction Management

G20. Identifier Type

The segment group GIN is present in Group 117. This segment group contains the “Commodity Identifier Codes”, the commodity line level of detail on the goods being imported, including all characteristics necessary for compliance identification. This is repeated for each commodity line. The segment provides commodity identification codes required by PGAs. See PGA annexes for specific requirements.

An identifier refers to a specific type of product, as opposed to a specific instance of that model (which is termed as “Identity”. A model number is an identifier code, whereas a serial number would be an “Identity “code.

The qualifier (data element 7402) is the “Object Identifier”.

For example:

If Code Tag CAD is selected, this signifies “Chemical Abstracts Service (CAS) Registry number to be used for Health Canada only (CPS, and PMRA).

Code Tag	Code Description	Notes
A01	AIRS Extension Code	
A02	AIRS End Use	
A03	AIRS Miscellaneous	
A04	AIRS Registration Type & Number	
CAS	Chemical Abstracts Service (CAS) Registry Number	HC (CPS, PMRA)
EXP	NRCAN Authorized Explosive Product Identifier	NRCAN Exp
FDA	FDA Product Code	HC - Rad Dev
GS1	GS1 Global Trade Identification Number (GTIN)	HC (API, Blood, CTO, CPS, DS CTD, MD, NHP, VD)
UN1	United Nations Transportation of Dangerous Goods Code (UNDG)	PMRA, Exp, PHAC, CNSC
EPA	EIPA Commodity Code	GAC
APH	AphiaID (from the World Register of Marine Species)	
EFN	Engine Family Name	ECCC - Vehicle and Engine Emissions Program
VTG	Vehicle Test Group	ECCC - Vehicle and Engine Emissions Program
EVN	Evaporative Family Name	ECCC - Vehicle and Engine Emissions Program

G21. Product Category Group

The Segment Group “PGI” - Canadian Product Category is present in group 117. This segment group contains Commodity line level of detail on the goods being imported including all characteristics necessary for compliance identification. This segment must be repeated for each commodity line.

It is used for categorization of goods using categorization schemes not governed by a standards body. Some PGAs use domestic categorization schemes that can be provided here. See PGA appendices for details.

The qualifier (data element 5389), “Code List Identification Code” is a code list qualifier from which the product category code was chosen
For example

If “Code Tag HC01” is selected, this code signifies that it is an import regulated by Health Canada and is the code for Active Pharmaceutical Ingredients.

Code Tag	Code Description	Notes
HC01	HC - Active Pharmaceutical Ingredients	Health Canada - Active Pharmaceutical Ingredients
HC02	HC - Blood and Blood Components	Health Canada - Blood Components
HC03	HC - Cells, Tissues and Organs	Health Canada - Human Cells, Tissues, Organs
HC04	HC - Donor Semen	Health Canada - Donor Semen
HC05	HC - Human Drugs (including Radiopharmaceuticals)	Health Canada - Human Drug (Including Radiopharmaceuticals)
HC06	HC - Medical Devices	Health Canada - Medical Devices
HC07	HC - Natural Health Products	Health Canada - Natural Health Products
HC08	HC - Veterinary Drugs	Health Canada - Veterinary Drugs
HC09	HC - Office of Controlled Substances	Health Canada - Office of Controlled Substance
HC11	HC - Consumer Products	Health Canada - Consumer Products
HC12	HC - Radiation Emitting Devices	Health Canada - Radiation Emitting Devices
HC13	HC - Pest Control Products	Health Canada - Pesticides (Pest Management Regulatory Agency)
EC01	ECCC - Vehicle Class	ECCC - Vehicle and Engine Emissions Program
EC02	ECCC - Engine Class	ECCC - Vehicle and Engine Emissions Program
EC03	ECCC - Wildlife Enforcement	Environment and Climate Change Canada - Wildlife Enforcement
TC01	TC - Tire Class	Transport Canada - Tires Program
TC02	TC - Tire Type	Transport Canada - Tires Program
TC03	TC - Tire Size	Transport Canada - Tires Program
TC04	TC - Title Status	Transport Canada - Vehicles Program - FMVSS Standard, Vehicles for Parts
TC05	TC - Vehicle Status	Transport Canada - Vehicles Program - Vehicles for Parts
FA01	Free Trade Agreement	Global Affairs Canada - Agriculture Products and Clothing and Textiles
FO01	DFO - Aquatic Biotechnology	Fisheries and Oceans - Aquatic Biotechnology
FO02	DFO - Trade Tracking	Fisheries and Oceans - Trade Tracking
PH01	PHAC	Public Health Agency of Canada - Human Terrestrial Animal Pathogens
NR01	NRCan - Office of Energy Efficiency	Natural Resources Canada - Office of Energy Efficiency

G22. Product Category

The Segment Group “PGI” - Canadian Product Category is present in group 117. This segment group contains Commodity line level of detail on the goods being imported including all characteristics necessary for compliance identification. This segment must be repeated for each commodity line.

It is used for categorization of goods using categorization schemes not governed by a standards body. Some PGAs use domestic categorization schemes that can be provided here. See PGA appendices for details.

The qualifier (data element 5388), “Product Group Name” which provides the coded product category that applies to this commodity line as required by the appropriate PGA.

For example:

If “Code Tag HC02” is selected, this code signifies that it is an import regulated by Health Canada Blood and Blood Components Program.

Code Tag	Code Description	Notes
FO01	DFO - Aquatic Biotechnology - Growth Enhancement	DFO - Aquatic Biotechnology
FO02	DFO - Aquatic Biotechnology - Disease Resistance	DFO - Aquatic Biotechnology
FO03	DFO - Aquatic Biotechnology - Shelf Life Extension	DFO - Aquatic Biotechnology

G23. PGA Compliance Statement

The Segment Group “RCS” - Requirements and Conditions is present in group 125. This segment group is used to provide attestations of the importer (or other parties) to various compliance statements. See PGA appendices for details regarding compliance statements. The qualifier (data element 7295), “Requirement or condition description identifier” which provides the appropriate code that indicates the compliance statements being attested to, as per PGA requirements for approval of this import.

For example:

If “Code Tag FA01” is selected, this code signifies that it is an import regulated by GAC Agriculture and Textiles – Resident Importer Certification.

Code Tag	Code Description	Notes
CF01	If the declaration (SG13.RCS.7295) indicates wood packaging, wood dunnage or wooden supports is present in this shipment (processing exception 56) than this code may be provided for each commodity line to indicate which commodity lines are compliant with ISPM-15	ISPM -15
FA01	“The importer of this commodity certifies that they are a resident of Canada, that is, either in the case of a natural person, a person who ordinarily resides in Canada and, in the case of a corporation having its head office in Canada or operating a branch office in Canada.”	GAC - Agriculture and Textiles - Resident Importer Certification
HC01	"The outer shipping container in which the semen is transported displays clearly, on the outside surface of that container, a declaration, signed by the processor or an authorized agent of the processor, certifying that the semen has been processed in accordance with the Processing and Distribution of Semen for Assisted Conception Regulations and quarantined for a minimum of six months."	HC - Donor Semen - Processor Declaration
TC01	"I [declare]/[have been authorized by the company referred to in this form to declare, on their behalf,] that the tires referred to in this form conforms to the standards prescribed for a tire of that class by section 3 to 5 of the Motor Vehicle Tire Safety Regulations at the time the tire was manufactured."	TC - Tires Program - Affirmation of Compliance for new/retreaded tires from all countries
TC02	"I [declare]/[have been authorized by the company referred to in this form to declare, on their behalf,] that the tires referred to in this form were manufactured for sale in the United States and conform on the day of their manufacture to the requirements established under chapter 301, title 49 of the United States Code."	TC - Tires Program - Affirmation of Compliance for new/retreaded tires from the USA
TC03	TC - Generic - Statement of Compliance Label Attached	
TC04	"I am the owner or agent of the owner of the vehicle described herein. This vehicle is being imported into Canada to be dismantled for parts and will not be rebuilt or Licenced in Canada. I further agree that the declared status for this vehicle to be dismantled for parts cannot be changed. I authorize the required service payment.	TC - Generic - Affirmation of Statement Compliance
TC05	Manufacturer Letter Attached	TC - Generic - Manufacturer Letter Attached

TC06	“I am the owner or agent of the owner of the vehicle described herein. This vehicle shall be modified to Transport Canada standards, with the prescribed time of 45 days and the current owner shall be responsible for any penalties prescribed for failure to do so. I acknowledge that receipt of the Vehicle Import Form and payment of fees are not warranty that the vehicle is necessarily capable of being brought into conformity with applicable law. The vehicle shall be taken to an authorized inspection centre and otherwise processed in accordance with the requirements of the Registrar of Imported Vehicles. I authorize the required service payment.”	TC- Foreign Manufacturer Affirmation Statement of Compliance
TC07	I [declare]/ [have been authorized by the company referred to in this form to declare, on their behalf,] that the tires referred to in this form bear a NSM, DOT, or JIS Symbol, are designed to fit on a rim that has a rim diameter greater than 406.4 mm (16 inches) and have a load range of not less than D (ply rating of not less than 8).	TC - Tires Program - Affirmation of Compliance for Used Tires from All Countries
TC08	I [declare]/[have been authorized by the company referred to in this form to declare, on their behalf,] that the tires referred to in this form were manufactured for sale in the United States and conform on the day of their manufacture to the requirements established under chapter 301, title 49 of the United States Code.	TC - Tires Program - Affirmation of Compliance for Used Tires from the USA

EC01	The company states that each vehicle or engine will bear the national emissions mark.	ECCC - Vehicle and Engine Emissions Program – On-Road Vehicles, Engines and Equipment - <u>National Emission Mark</u>
EC02	The company states that it will have the evidence of conformity referred to in section 35 [i.e. the vehicle or engine is covered by an EPA certificate, is sold concurrently in Canada and the U.S., bears the EPA emission control information label and is able to provide copies of records submitted to the EPA in support of the application for the EPA certificate, application for amendments made to the EPA certificate and any records submitted to maintain the EPA certificate] or 35.1 [i.e. the vehicle has the same emission control features as the vehicle tested to obtain the EPA certificate and has no features that could cause it to have a higher level of emission than that certified vehicle, has a copy of the EPA certificate that the vehicle is equivalent to and is able to provide copies of records submitted to the EPA in support of the application for the EPA certificate in respect of the vehicle to which it is equivalent, application for amendments made to that	ECCC - Vehicle and Engine Emissions Program – On-Road Vehicles, Engines and Equipment- <u>EPA Certified or Considered Equivalent to EPA Certified</u>

	EPA certificate and any records submitted to maintain the EPA certificate].	
EC03	The company states that it will have the evidence of conformity referred to in section 36 [i.e. for vehicles or engines other than those referred to in section 35 or 35.1].	ECCC - Vehicle and Engine Emissions Program – On-Road Vehicles, Engines and Equipment- <u>Canada Unique Vehicles, Engines</u>
EC04	The company states that 1) it has a statement from the manufacturer of the vehicle or engine that the vehicle or engine will, when completed in accordance with instructions provided by the manufacturer, conform to the standards prescribed under the <i>On-Road Vehicle and Engine Emission Regulations</i> ; and 2) the vehicle or engine will be completed in accordance with those instructions.	ECCC - Vehicle and Engine Emissions Program – On-Road Vehicles, Engines and Equipment - <u>Incomplete Vehicles or Engines (On-Road)</u>
EC05	The company states that each engine bears the national emissions mark.	ECCC - Vehicle and Engine Emissions Program – Off-Road Compression (Diesel) Engines/ Off-Road Small Spark-Ignition (Gasoline) - <u>National Emission Mark</u>
EC06	The company states that it is able to produce the evidence of conformity referred to in section 16 [i.e. the engine is covered by EPA certificate of conformity, is sold concurrently in Canada and the U.S., and bears the EPA emission control information label].	ECCC Vehicle and Engine Emissions Program – Off-Road Compression (Diesel) Engines - <u>EPA Certified and Sold Concurrently in Canada and the U.S.</u>
EC07	The company states that it is able to produce the evidence of conformity referred to in paragraph 17(1)(a) [i.e. for transition engines that are or will be installed in or on machines sold concurrently in Canada and the U.S.].	ECCC - Vehicle and Engine Emissions Program – Off-Road Compression (Diesel) Engines - <u>Transition and Sold Concurrently in Canada and the U.S.</u>
EC08	The company states that it has submitted the evidence of conformity in accordance with paragraph 17(1)(b) [i.e. for engines not covered by an EPA certificate, engines covered by an EPA certificate that are not sold concurrently in Canada and the U.S., transition engines that are or will be installed in or on machines not sold concurrently in Canada and the U.S., and replacement engines].	ECCC- Vehicle and Engine Emissions Program – Off-Road Compression (Diesel) Engines - <u>Canada Unique Engines</u>
EC09	The company states that 1) it has a statement from the manufacturer of the engine that the engine will, when completed in accordance with instructions provided by the manufacturer, conform to the standards prescribed under the <i>Off-Road Compression-Ignition Engine Emission Regulations</i> ; and 2) the engine will be completed in accordance with those instructions.	ECCC – Vehicle and Engine Emissions Program – Off-Road Compression (Diesel) Engines - <u>Incomplete Engines</u>
EC10	The company states that it is able to produce the evidence of conformity referred to in section 16 [i.e. the engine is covered by EPA certificate of conformity, is sold concurrently in Canada and the U.S., and bears the EPA emission control information label].	ECCC – Vehicle and Engine Emissions Program – Off-Road Small Spark-Ignition (Gasoline) - <u>EPA Certified and Sold Concurrently in Canada and the U.S.</u>

EC11	The company states that it has submitted the evidence of conformity in accordance with section 17 [i.e. for engines not covered by an EPA certificate or engines covered by an EPA certificate that are not sold concurrently in Canada and the U.S.].	ECCC - Vehicle and Engine Emissions Program - Off-Road Small Spark-Ignition (Gasoline) - <u>Compliance Option - Canada Unique Engines (Gasoline)</u>
EC12	The company states that 1) it has a statement from the manufacturer of the engine that the engine will, when completed in accordance with instructions provided by the manufacturer, conform to the standards prescribed under the <i>Off-Road Small Spark-Ignition Engine Emission Regulations</i> ; and 2) the engine will be completed in accordance with those instructions.	ECCC - Vehicle and Engine Emissions Program - Off-Road Small Spark-Ignition (Gasoline) - <u>Compliance Option - Incomplete Engines (Off Road Spark-Ignition)</u>
EC13	The company states that each engine, vessel or vehicle bears the national emissions mark.	ECCC - Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles - <u>Compliance Option - National Emission Mark</u>
EC14	The company states that it is able to produce the evidence of conformity referred to in subsection 35(1) [i.e. the engines, vessels or vehicles are covered by EPA certificate(s) of conformity, are sold concurrently in Canada and the U.S. and bear the EPA emission control information label].	ECCC - Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles - <u>EPA Certified, Sold Concurrently and Bears Emission Control Information Labels</u>
EC15	The company states that it has submitted the evidence of conformity in accordance with subsection 35(2) [i.e. for engines, vessels or vehicles not covered by an EPA certificate or engines, vessels or vehicles covered by an EPA certificate that are not sold concurrently in Canada and the U.S.].	ECCC - Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles - <u>Compliance Option - Canada Unique Engines, Vessels or Vehicles</u>
EC16	The company states that 1) it has a statement from the manufacturer of the engine, vessel or vehicle that the engine, vessel or vehicle will, when completed in accordance with instructions provided by the manufacturer, conform to the standards prescribed under the <i>Marine Spark-Ignition Engine, Vessel and Off-Road Recreational Vehicle Emission Regulations</i> ; and 2) the engine, vessel or vehicle will be completed in accordance with those instructions.	ECCC - Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles - <u>Incomplete Engines, Vessels or Vehicles</u>
EC17	ECCC - these goods are subject to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) as regulated in Canada under the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act (WAPPRIITA) or are listed in Schedule II of the Wild Animal and Plant Trade Regulations (WAPTR).	Environment and Climate Change Canada - Wildlife Enforcement

EC18	ECCC - these goods are not subject to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) as regulated in Canada under the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act (WAPPRIITA) or are listed in Schedule II of the Wild Animal and Plant Trade Regulations (WAPTR).	Environment and Climate Change Canada – Wildlife Enforcement
------	--	---

G24. Country Codes

Many fields within the IID require valid country codes. For most fields within the IID these are expected to be one of:

- A valid two-character alphabetic code (Alpha-2) code from the ISO-3166 list. The ISO provides an interactive, updated list at the following URL: <https://www.iso.org/obp/ui/#search>, and subscriptions are available.

For LPCO issuing/authentication/origin country codes (SG12.LOC and SG124.LOC respectively), the following **additional** codes are valid to support certain LPCOs that are issued by entities that are not countries:

- The code 'EU' from the ISO-3166 *Exceptionally Reserved* list, for use when a specific country is not applicable (e.g., a certificate that is issued by the European Union)

G25. Amendment Codes

An IID amendment is a change submitted post-arrival. One of the following codes must be provided in SG15.AJT to justify the change:

Code Tag	Code Description	Notes
20	Amendment to description of goods	
30	In bond port/sub-location code amendments	
35	Clerical error when keying data	
60	Amendment not elsewhere specified	
65	Overage: any change in the number of pieces in a shipment that is higher than the quantity reported at FPOA. Note the initial quantity being amended must be greater than zero.	
70	Shortage: any change in the number of pieces in a shipment that is lower than the quantity reported at FPOA. Note the quantity cannot be reduced to zero, which would then be a cancellation, not amendment.	
80	Change request delayed by client systems outage	
85	Change request delayed by CBSA/PGA systems outage	

G26. Unit of Measure “Measured Attribute Codes”

These codes define the type of calculation performed to determine the measurement being described in an MEA segment. For simplicity sake, the CBSA only supports a small subset of all the available codes for 6313 within the UN/EDIFACT 13A definitions. These are:

Code Tag	Short Description	Long Description
AAB	Goods item gross weight	Weight (mass) of goods including packing but excluding the carrier's equipment
AAF	Net net weight	Weight (mass) of goods without any packaging.
AAA	Net weight	Weight of goods including any packaging that normally going with the goods
AAC	Total net weight	Total weight of goods excluding packaging
AAD	Consignment gross weight	Total gross weight (mass) of all goods items referred to as one consignment including packaging but excluding any transport equipment
AAW	Gross volume	The volume unadjusted for factors such as temperature or gravity
AAX	Net volume	The volume after adjustment for factors such as temperature or gravity
ABS	Item weight	Weight at the line item level (as categorized by the importer)
AEO	Radioactivity	Activity of radioactive material.
BRG	Unit weight	The weight of a unit (as appropriate to the commodity being described)
BRI	Unit volume	The volume of a unit (as appropriate to the commodity being described)

Appendix H: Error Code Tables

The following links contain the list of all error codes for ACROSS including electronic release, Advance Commercial Information (marine, air and rail) and Customs Self-Assessment program.

Appendix I: Business Glossary of IID Data Elements

The following is a partial list of terms used within the MIG that may be of assistance in understanding the IID transmission requirements.

Data Element Name	Definition	WCO Data Element Name	WCO Definition
Transaction Control Data Elements			
Additional process details	The date and time requested by the government service requestor for service	Requested Government Service Date and Time	The date and time requested by the government service requestor for service
Estimated Date/Time of Arrival	The estimated date/time of arrival at FPOA (first port of arrival)	Date/Time of importation or date	Date and time of importation into port limits
Message Function, coded	Code supplied by the originator to identify how the transaction is to be processed.	Message Function, coded	Code indicating the function of a document.
PGA Responsible Agency, Coded	The PGA with regulatory requirements for the commodity/commodities being imported into Canada.	Government Agency Name, Coded	Government agency, responsible for regulatory and statutory obligations.
Port of Clearance	CBSA Office number where the goods are to be released	Office of declaration, coded	To identify a location at which a declaration is lodged.
Process/Exception Type	To indicate applicable Government procedure	Government Procedure, coded.	Code specifying a procedure.
Service Option ID	A code supplied by the originator to identify how the transaction is to be processed by the CBSA.	Declaration name, coded	Code specifying the name of a document
Transaction Number	Originator assigned unique number for clearance of goods destined to the same importer	Document reference number	Reference number identifying a specific document.
Name and Address Identifier			
Agent	The broker or agent responsible for the CBSA clearance of the shipment at the Port of Clearance.	Agent, coded	Identification of a party authorised to act on behalf of another party.
Applicant	The name and address of the party who presents a document or data for the approval, consideration, or decision of another.	Submitter/Applicant	The name and address of the party who presents a document or data for the approval, consideration, or decision of another.
Assembler	The party responsible for putting together various components or parts into a product or commodity in its form or condition as imported.	Assembler	The party responsible for putting together various components or parts into a commodity in its form or condition as imported.
Cargo Control Number	Reference identifier assigned by the carrier or freight forwarder to the transport document. The number must begin with the four-character CBSA-issued Carrier Code.	Carrier Identification	To identify a party providing the transport of goods between named points.
Commodity End-User	The party who is actually using the product in Canada (e.g. a physician in a specific hospital). Synonymous with ultimate consignee for IID purposes.	Ultimate Consignee	The name and address of the party who has been designated on the invoice or packing list as the final recipient of the stated merchandise.
Country of Export	The country or state from which the goods were last exported for importation into Canada without any commercial transaction taken place in intermediate countries. If country of Export is U.S., provide US State code.	Country of exportation, coded	To identify the country from which the goods are originally exported without any commercial transaction taken place in intermediate countries.

Data Element Name	Definition	WCO Data Element Name	WCO Definition
Deliver to party	The name and address to which the goods are physically delivered. Also known as Delivery Destination.	Deliver to Party	Name and address of the party to which goods are to be delivered. Address, region and/or country as required by national legislation or according to national requirements.
Exporter	Name and address of party who makes, or on whose behalf, the export declaration, is made and who is the owner of the goods or has similar right of disposal over them at the time when the declaration is accepted.	Exporter name	Name [and address] of party who makes - or on whose behalf - the export declaration - is made - and who is the owner of the goods or has similar right of disposal over them at the time when the declaration is accepted.
Feedlot	The name and address of the commercial establishment(s) in which the livestock were fed.	Feedlot	The name and address of a commercial establishment that feeds livestock.
Grower	The name and address of the person or organization that grows commercial crops.	Grower	The name and address of the person or organization that grows commercial crops.
Importer	The importer number is the CRA issued business number (BN) that must be specific to the Importer for their import/export account. A generic importer number will not be accepted.	Importer coded	Identifier of party who makes - or - on whose behalf a Customs clearing agent or other authorised person makes - an import declaration. This may include a person who has possession of the goods or to whom the goods are consigned.
Manufacturer	Name and address of the entity that last manufactures, assembles, produces, or grows the commodity or name and address of the supplier of the finished goods in the country from which the goods are leaving.	Manufacturer	Name [and address] of party which manufactures goods.
Purchaser	Name and address of last known entity to whom the merchandise is sold, leased or otherwise transacted	Buyer Name	Name [and address] of a party to which merchandise or services are sold.
Vendor	The complete name (including company name if applicable) and address (street, city, location) of the party selling the goods to a purchaser and/or the party consigning the goods to Canada.	Seller, name	Name [and address] of a party selling merchandise or services to a buyer
Veterinarian	The name and address of the person who practices veterinary medicine.	Veterinarian	The name and address of the person who practices veterinary medicine.
Locations			
CBSA Location of goods	The sub-location warehouse where the shipment is warehoused.	Location of goods	To identify the place where goods are located.
Country of origin, coded	The country in which the goods have been grown, produced or manufactured, according to criteria laid down for the application of the Customs tariff or quantitative restrictions, or any measure related to trade. If country of origin is U.S., provide US State Code.	Country of Origin, coded	To identify the country in which the goods have been produced or manufactured, according to criteria laid down for the application of the Customs tariff or quantitative restrictions, or any measure related to trade.
Foreign Registered facility	Foreign registered facility where the commodity have been further processed, captured or cultured prior to arriving in Canada	Registered Facility Name	Foreign registered facility where the commodity have been further processed, captured or cultured prior to arriving in Canada
Permitted port, coded	The authorized CBSA release office through which the PGA has permitted the importation of the goods to take place.	Permitted port, coded	The authorized office through which the authorized party is allowed to bring the goods identified on the LPCO

Data Element Name	Definition	WCO Data Element Name	WCO Definition
Place of physical examination	Identification of a place where the goods are to be examined if this place is different from the location identified as part of the CBSA location of goods field, or in the Facilities/Registered Facilities field.	Place of physical examination	Identification of a place where goods are to be examined if this place is different from the place where the goods are located (WCO Ref. 078).
Source Country, coded	Identifies the country where the harvest, growth, production, processing sale, or catch took place or where raw materials came from, if different than provided in Country of origin.	Source country, coded	Code of the source country
Source geographic region	Identifies the non-political region of source (e.g., Caspian Region) where the harvest, growth, production, processing sale, or catch took place or where raw materials came from.	Source geographic region	To identify the source geographic region (non-political)
Licence/Permit/Certificate/Other (LPCO) Related Definitions			
Applicant	The party which applied for the LPCO		
Authorized Party	The party to whom the LPCO is issued	LPCO Authorized Party, Text	The party to whom the Licence , permit, certificate, or other required document (LPCO) is issued.
Digital Image Reference	Reference to a unique identifier of the digital image of the LCPO. For the SWI, an identifier referred to as a URN (Unique Reference Number) is used.		
Document Effective Date	The effective date of the Licence , visa, permit, certificate.	Document Effective Date	The effective date of the Licence , visa, permit, certificate.
Document Expiration Date	The expiry date of the document (e.g. Licence , visa, permit, certificate)	Document Expiration (Expiry) Date	The expiry date of the document (e.g. Licence , visa, permit, certificate)
Document issue place	Name of a location where a document was issued.	Additional document issue place	Name of a location where a document was issued.
Document Issuing Date	Date at which an additional document was issued and when appropriate, signed or otherwise authenticated.	Additional Document Issuing Date	Date at which an additional document was issued and when appropriate, signed or otherwise authenticated.
Document reference Number	Applicable registration/permit numbers associated to the commodity	Additional document reference number	Identifier of a document providing additional information.
Document type, coded	Identifies the registry against which the Registration Number will be validated., i.e. Cdn Permit Number, Foreign Certificate Number	Additional document type, coded	Code specifying the name of an additional document.
Place of authentication of document	Name of a location where a document was signed or otherwise authenticated.	Place of authentication of document	Name of a location where a document was signed or otherwise authenticated.
Secondary reference information	Miscellaneous textual information that may be required for certain document types to validate them		
Commodity			
Actual Temperature	Provide actual temperature	Actual temperature	The recorded temperature
Affirmation of Compliance, coded	Indicator that the Importer certifies compliance to the text on the conformance/compliance label affixed to the commodity or certification of specific textual declarations.	Criteria Conformance Text	A code indicating specific conformance with statutory and regulatory requirements
Commodity Band Name	A name or a term that identifies the goods as assigned by a seller as distinct from those of other sellers, also known in legal terms as trademark. A brand helps to identify one item, a family of items, or all items of that	Commodity name	A name or a term that identifies the goods as assigned by a seller as distinct from those of other sellers, also known in legal terms as trademark. A brand helps to identify one item, a family of items, or all items of that seller.

Data Element Name	Definition	WCO Data Element Name	WCO Definition
	seller.		
Commodity characteristics	Description of Commodity (coded) such as goods grading, genetic modification, quality, that distinguish it from similar commodity.	Commodity characteristic	Descriptive information about the commodity characteristics such as goods grading, genetic modification, quality, etc. that distinguishes the commodity from similar commodities
Commodity Identifier	Identity number used to uniquely identify the commodity in the global supply chain, e.g. The GTIN, UPC Code, DIN, TSN	Commodity Identifier	The commercial categorization of a commodity, e.g. PLU number
Commodity identity number	Unique identifier of the commodity as affixed by the Manufacturer, e.g. SN, VIN, Brand/tag number, engine number	Commodity identity number qualifier	The type of unique number affixed by the manufacturer to one instance of a product for identification purposes, such as a serial number, vehicle identification number (VIN).
Commodity Lot Number	The lot number that the manufacturer/producer/grower assigned to the product	Commodity lot number	Identification number of a production lot.
Commodity Process Duration	The date/time that the commodity process, method or procedure took place Production Date Code (FSP) Main Assembly Year/ Month	Commodity process duration	The date on which the process associated with the commodity was performed
Commodity process type identification	A description of the method used by the manufacturer or producer regarding the method or other process applied to the commodity.	Commodity process type identification	A code of the process or production associated with the commodity (e.g. method of growing, pre-treatment, etc.)
Commodity temperature category	The type of temperature being provided (e.g., freezing point, flash point etc.)	Commodity temperature category	A code representing the storage condition of a commodity.
Constituent element of component name	The active ingredients/components of the product.	Constituent element or component name	The name of the specified material within the product, e.g. asbestos or milk solids.
Description of goods	Plain language description of the nature of the goods sufficient to identify it for HS Code, phytosanitary, statistical or transport purposes.	Goods Description	Plain language description of the nature of a goods item sufficient to identify it for cross-border regulatory purposes such as customs, phytosanitary, statistical or transport.
H.S. Number	The 10 digit harmonized classification number (as per Tariff) related to each commodity.	Commodity Classification	The non-commercial categorization of a commodity by a standard-setting organization.
